Executive Summary

During May-July 2013, the University of New Hampshire Survey Center conducted a survey for New Hampshire's nine Regional Planning Commissions, as part of the *Granite State Future* and *New Hampshire Broadband Mapping and Planning* initiatives. Funded in part by a grant from the US Department of Housing and Urban Development, *A Granite State Future* is intended to engage New Hampshire citizens in a public dialogue, at the local, regional and state levels, about what they want for the future of their communities and state. Results from the survey will inform updates to the Regional Master Plans in each of NH's nine planning regions. These regional plans, whose development has been required under State law (RSA 36:47) for over 40 years, are advisory documents designed to provide municipalities with data and strategies to support local decision-making as well as enhance regional cooperation.

With support from the National Telecommunications Information Administration of the US Department of Commerce and in conjunction with the University of New Hampshire and other partners, the New Hampshire Broadband Mapping and Planning Program (NHBMPP) is a comprehensive, multi-year effort that seeks to understand where broadband is currently available in NH, how it can be made more widely available in the future, and how to encourage increased levels of broadband adoption and usage. Results from the survey will inform the broadband plans developed in each of NH's nine planning regions.

The specific areas of interest are New Hampshire resident's opinions on a range of issues facing communities around the State – transportation and broadband infrastructure, housing, economic development, natural resource management, energy and natural hazard mitigation. A survey of two thousand nine hundred and thirty-five (2,935) New Hampshire adults was conducted by telephone between May 9 and July 21, 2013. The response rate was 33% and the margin of sampling error for the survey is +/- 2.2%. (See Technical Report for a more detailed description of survey methods.) The following figures display survey results, detailed tabular results can be found in Appendix A, Appendix B contains the open-ended responses and Appendix C contains the survey instrument.

The intent of this report is to provide NH's regional planning commissions and other interested parties with a broad overview of the data collected. This report should serve as a concrete focus for engaging with these data and using them to design and implement strategies for regional planning. However, every summary statement made in this report will generate numerous questions from the reader about how this data element or piece of information applies to other specific strata of the population or planning domain. Many of these questions can readily be answered by the extensive cross tabulations that are provided for each survey question in Appendix A of this report. Some of the questions that will be generated by this report will require more extensive and sophisticated analyses of these data. Knowing this, it is our hope that New Hampshire Planning leaders will share these data with other academics and community organizations that will actively use these data to help New Hampshire discover more about their local population and about how better to target planning initiatives to meet the needs of those in specific communities.

Each section begins with a summary narrative that is written in the form of short, bulleted sentences that describe selected indicators on the data tables and charts. These narratives are not intended to explain or summarize every indicator in the accompanying data tables. This section was not meant to provide the reader with any conclusions. It was intended to spark interest in the data and invite you to ask questions of

this information and use the data cross tabs accompanying this report to understand better the planning concepts you are concerned about.

The charts and tables that follow display major findings of the survey. They are not intended to exhaustively present all the data in the survey. If no demographic differences were listed then responses were consistent across demographic categories. Not all findings are noted in this report; these are the highlights of the results. Additional results can be found in the detailed tables located in Appendix A.

Key Findings

- Residents believe that environmental protection and natural resource protection should be the top priority for investing public dollars, and a majority believes that all environmental protection measures mentioned should be high priorities for policymakers.
- Residents view energy efficiency and energy choices as the second most important priority for investing public dollars. Residents are largely in favor of all the proposed energy efficiency and renewable energy projects, except for the idea of having public charging stations made for electric vehicles.
- Most residents (87%) think local governments should at least be somewhat involved in developing policies for renewable energy facilities.
- Residents view safe and affordable housing as the third most important priority for investing public dollars. The development of single family housing and assisted living facilities were particularly favorable to residents while development of manufactured housing and apartments were the least favorable.
- Residents think that future development should occur in areas that are already developed (70%).
- Residents say that the top activity that their community should actively encourage is promoting local agriculture (91%). Majorities want to encourage many other activities as well, including protecting historic buildings and neighborhoods (86%) and promoting safe places to walk or bike (86%).
- Residents view quality schools as the most important thing to have in their community (94%). Other important aspects of a community include having nearby job opportunities (86%), small businesses and retail stores (85%), farms, farm stands and forestry (83%), and grocery stores (82%).
- Residents view maintaining our bridges and highways to be the most important priority for transportation funding (74%). Residents were split on funding for other transportation initiatives, with a narrow majority favoring funding for senior and special needs transportation (55%) and availability of bike paths (53%).
- Nine in ten NH residents (91%) have internet access at home, and almost all of them (92%) consider their internet access adequate for their uses. Almost as many (85%) would not be willing to pay any additional money in exchange for faster internet speeds.

Housing

Over a third of residents (37%) describe where they live as a neighborhood close to a town center, followed by those in a rural location away from the town center (28%), a development away from a town center (27%), in downtown or a town center (7%) and 1% who would classify their neighborhood in another way.

Figure 1: How would you classify the neighborhood where you live? (q1)

When asked whether they would prefer to live in a small house but have a short commute to work or a large home with a longer commute, a majority (53%) said they would prefer the small home and short commute and 44% would prefer the large home and long commute while 3% did not know (**Figure 2**).

Meanwhile, a majority of residents (56%) would prefer to live in a strictly residential neighborhood while 42% would prefer a mixed residential/commercial neighborhood and 1% did not know (**Figure 3**).

- Households earning \$160,000 or more, those who work at home and those who work in Northern New Hampshire are more likely to want a larger home with a longer commute.
- Older adults (70 and older), those who are retired and not working and households earning between \$20,000 and \$39,999 are more likely to choose a smaller home with a shorter commute.

Figure 2: Large Home with Long Commute or Small Home with Short Commute? (q7a)

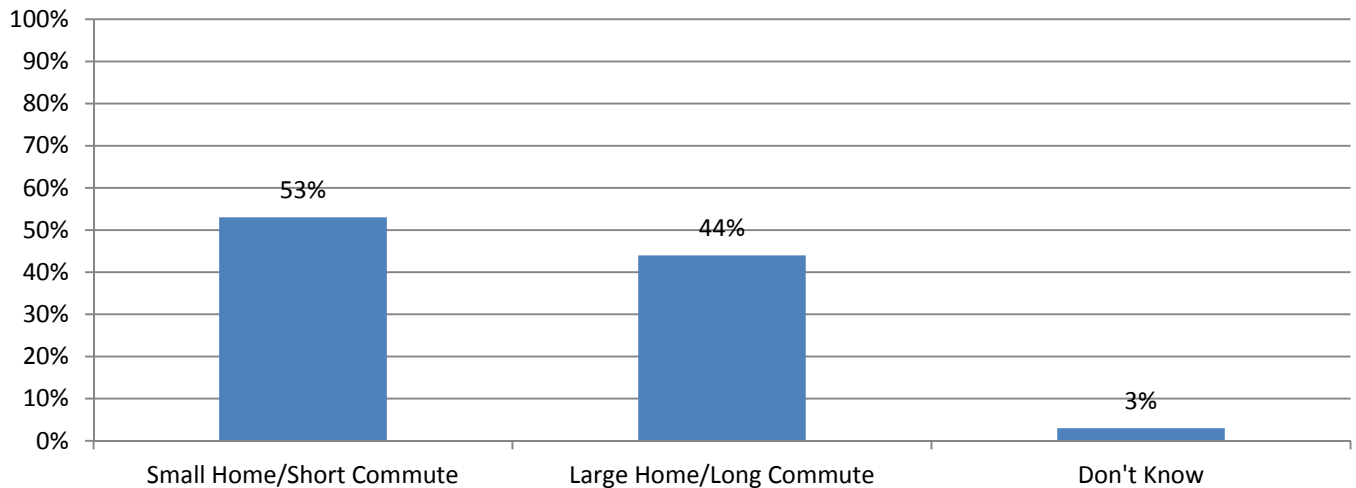

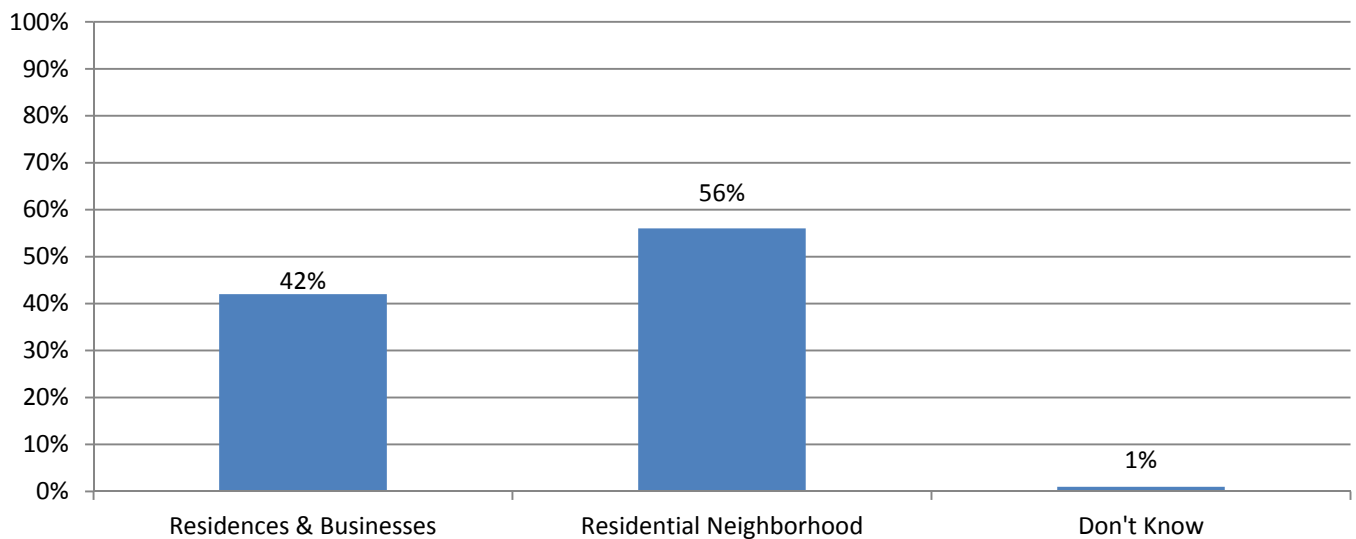

Figure 3: Mixed Neighborhood with Stores or Residential Only Neighborhood? (q7b)

Nearly three-quarters (74%) of those who answered that they would like to live in a neighborhood with a mix of residences and business would prefer a smaller house with a short commute. A majority (60%) of those who chose a residential neighborhood where you have to drive to services also prefer a larger house with a longer commute.

Table 1: Living Preference – Home Size and Commute vs. Type of Neighborhood

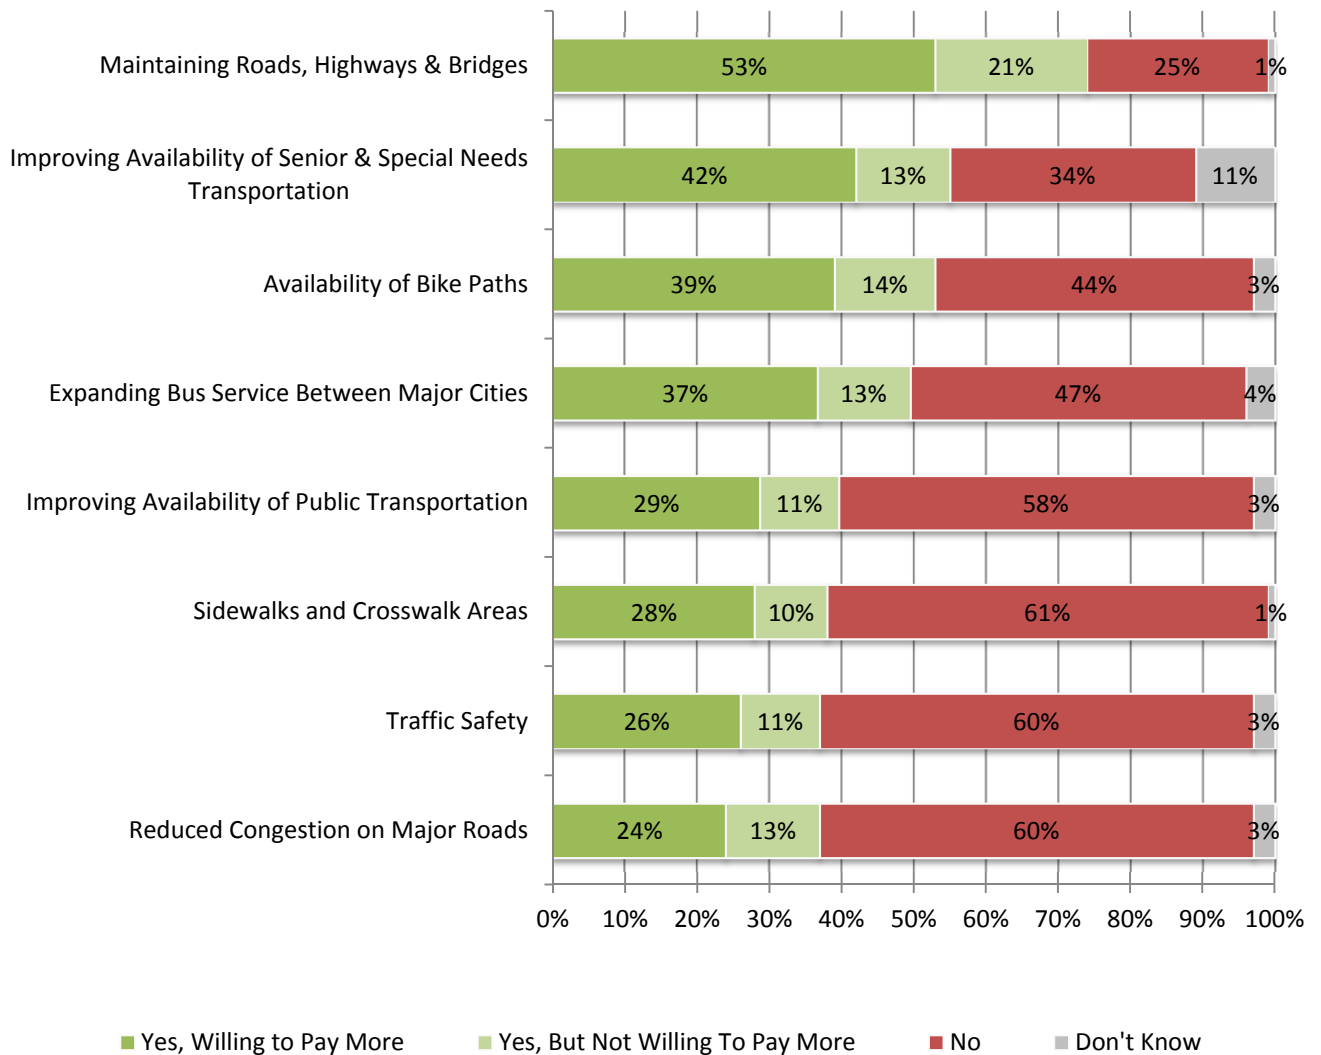

Q7A Would you choose to live in a small home with a small backyard, if it means you have a short trip to work, school or shopping, or would you choose to live in a large home with a large backyard, with a long trip to work school or shopping.	Q7B Would you choose to live in a neighborhood with a mix of residences and businesses where you can walk to stores, schools, and services, OR would you choose to live in a residential-only neighborhood where you needed to drive a car to get to stores, schools and services?		
	Mix of residences and businesses - walk	Residential neighborhood - drive	Total
Small home, small yard	74% (888)	40%(634)	55% (1522)
Large home, large yard	26% (309)	60% (947)	45% (1256)

Transportation

Nearly three-fourths (74%) of residents think that policy makers should invest more money in maintaining roads, highways and bridges (with 53% willing to pay more in taxes to do so), followed by improving availability of senior and special needs transportation (55%), availability of bike paths (53%), expanding bus service between major cities (50%), improving the availability of public transportation (40%), sidewalks and crosswalk areas (38%), traffic safety (37%), and reduced congestion on major roads (37%).

- Those in the Northern and Upper Valley/Southwest regions are *less* likely to see reducing congestion as worthy of investment.
- Households earning less than \$40,000 are *more* likely to want investment in improving the availability of public transportation.

Figure 4: Should Policy Makers Invest More Money in Transportation (q2)

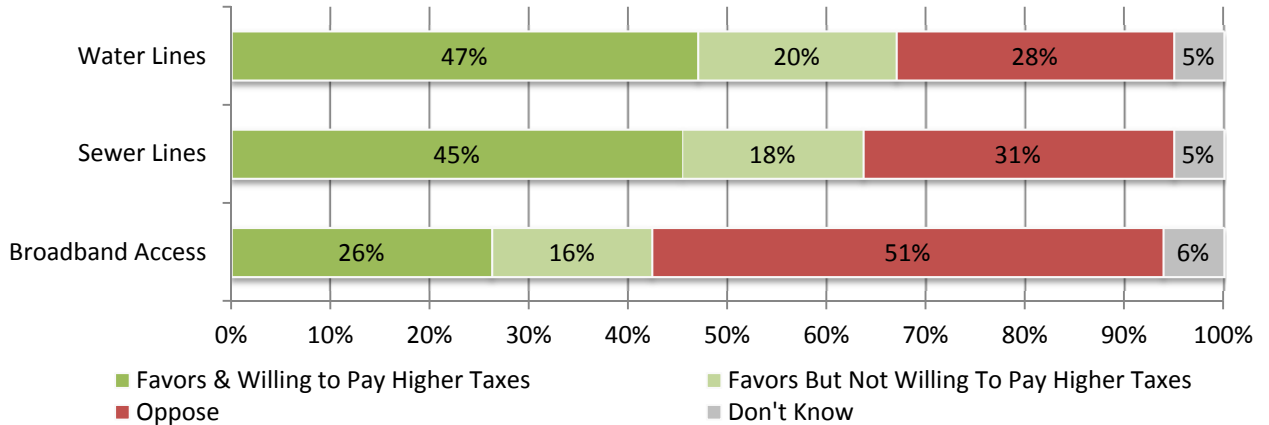

Community Development

Over two thirds (67%) of residents favor using municipal funds to provide water lines to existing and potential development (although just 47% would be willing to pay more in taxes for it), followed by sewer lines (63%) and broadband access (42%).

- Those who are aged 18 to 29 and those who live in the Northern and Upper Valley/Southwest regions of the state are *more* likely to favor higher taxes for broadband access.

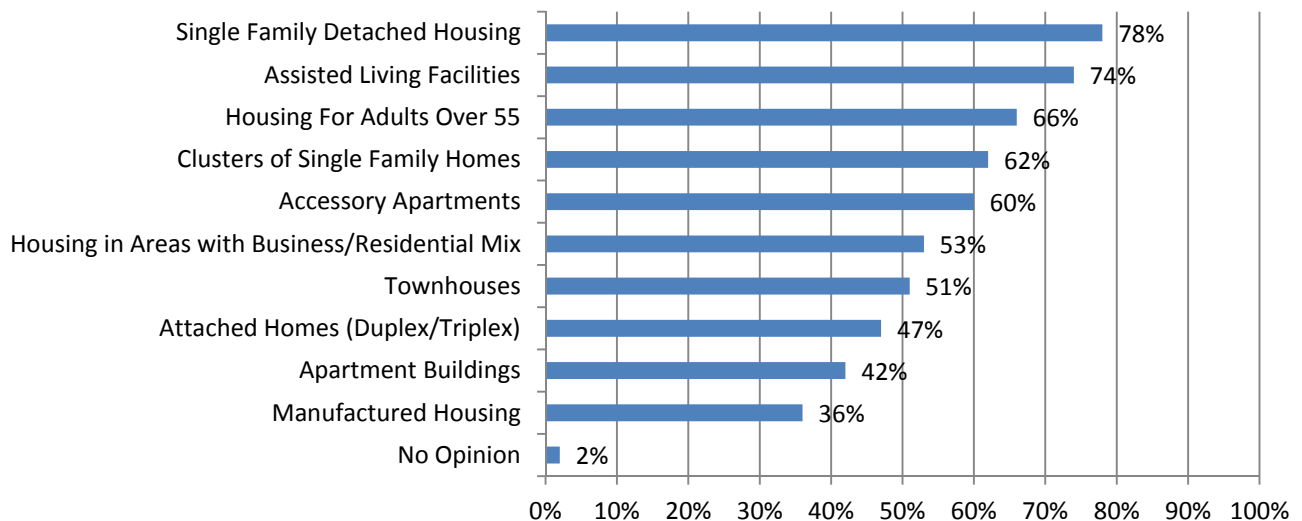

Figure 5: Favor or Oppose Using Municipal Funds to Provide Utilities for Development (q11)

Over three-fourths (78%) of residents think that their town should encourage single family detached housing, followed by assisted living facilities (74%), housing for adults over 55 (66%), clusters of single family homes (62%), accessory apartments (60%), housing in areas with business/residential mix (53%), townhouses (51%), attached homes (47%), apartment buildings (42%), and manufactured housing (36%).

- Households earning less than \$40,000, those aged 18 to 39 and those who are non-white are *more* likely to want their town to encourage apartments.

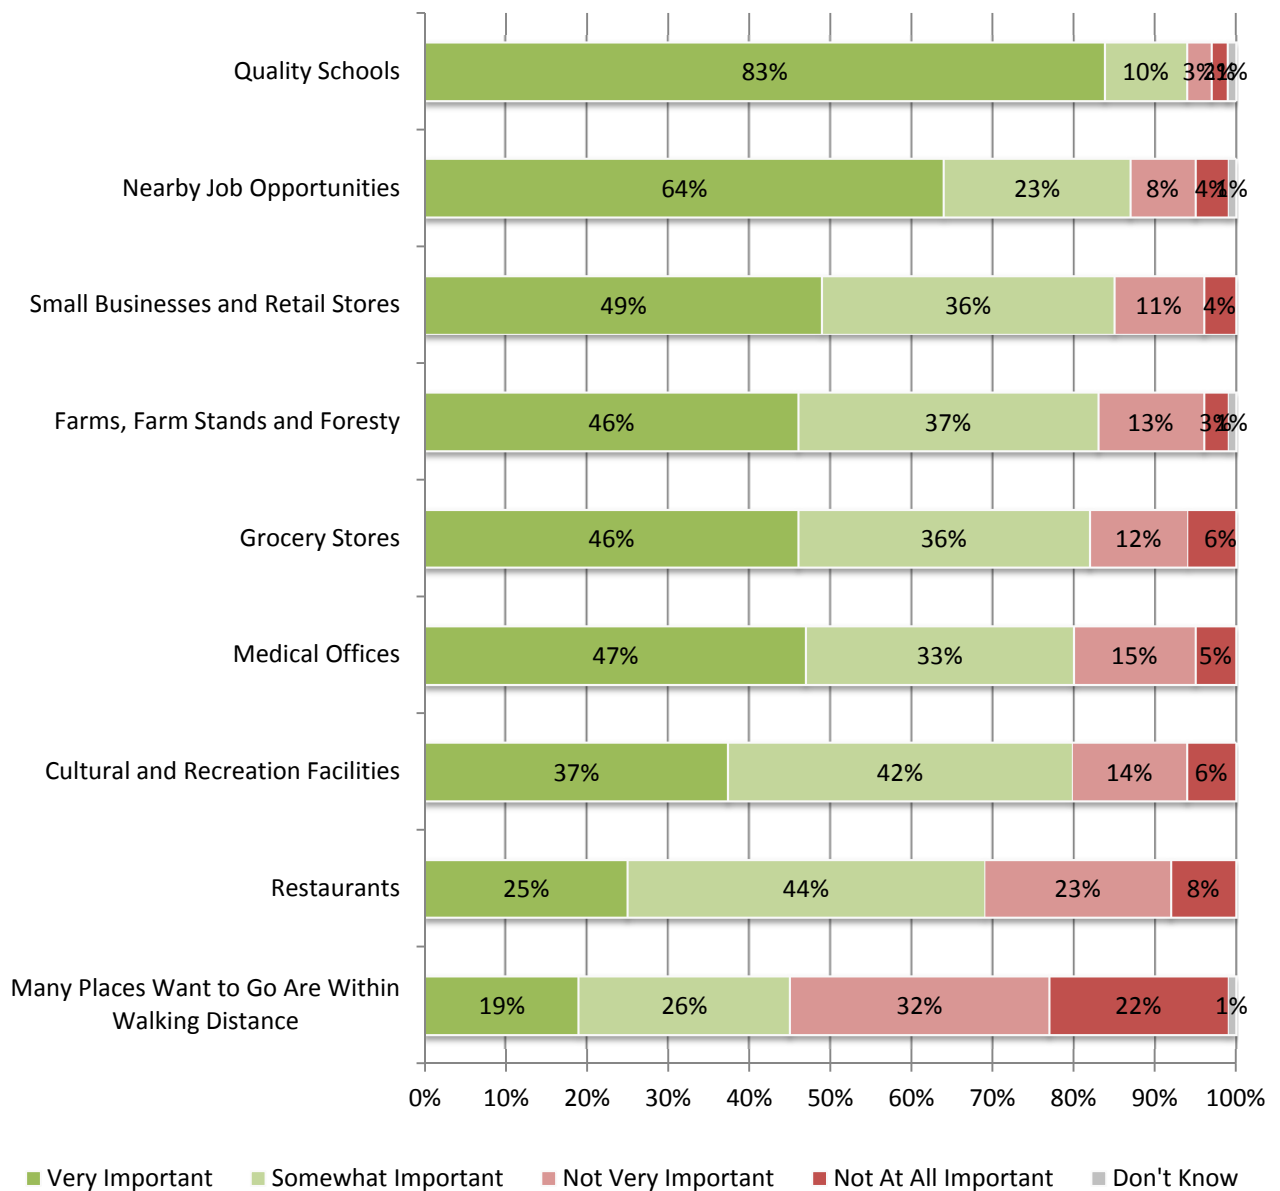

Figure 6: What kinds of housing should your town encourage? Check all that apply (q6)

Nearly all (93%) residents find it important (83% “very important” and 10% “somewhat important”) that there are quality schools in their community, followed by having nearby job opportunities (87%), small businesses and retail stores (85%), farms, farm stands and forestry (83%), grocery stores (82%), medical offices (80%), cultural recreation facilities (79%), restaurants (69%) and that many places they want to go are within walking distance (45%).

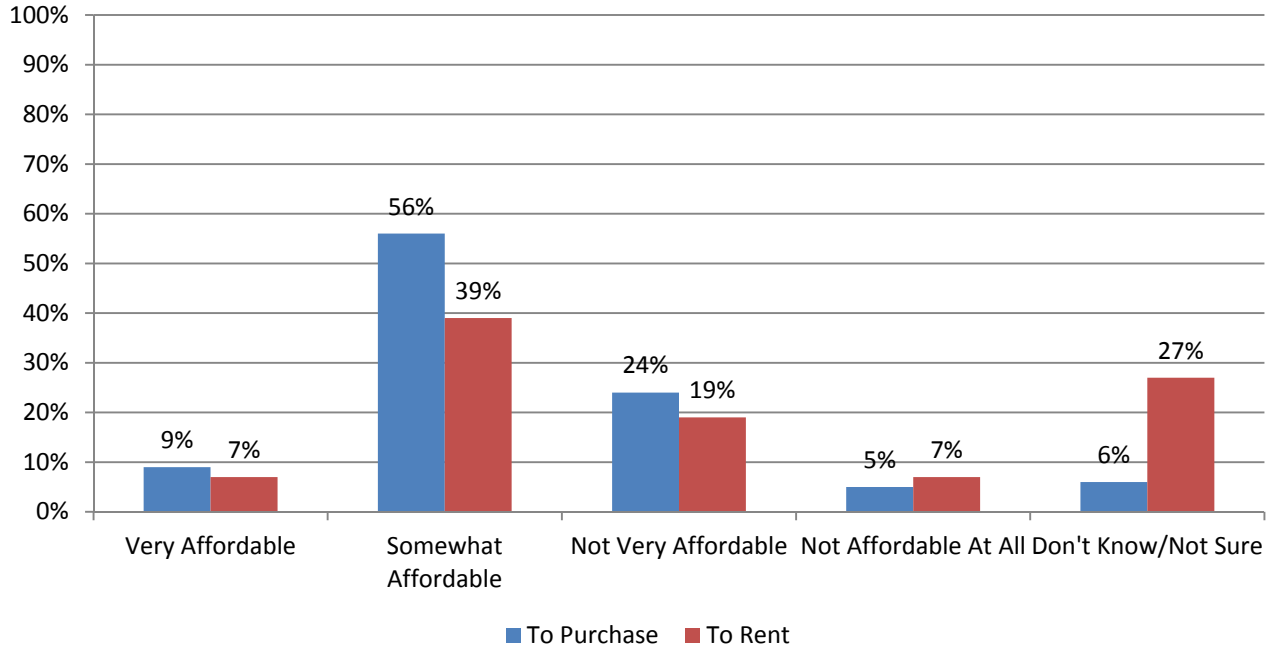

- Those who are aged 18-29, households earning between \$20,000 and \$39,999 and those who are non-white are *more* likely to think it is very important to have medical offices.
- Those aged 18 to 29 and those unemployed and looking for work are *more* likely to think nearby job opportunities are very important.

Figure 7: How Important Is It To Have In Your Community? (q3)

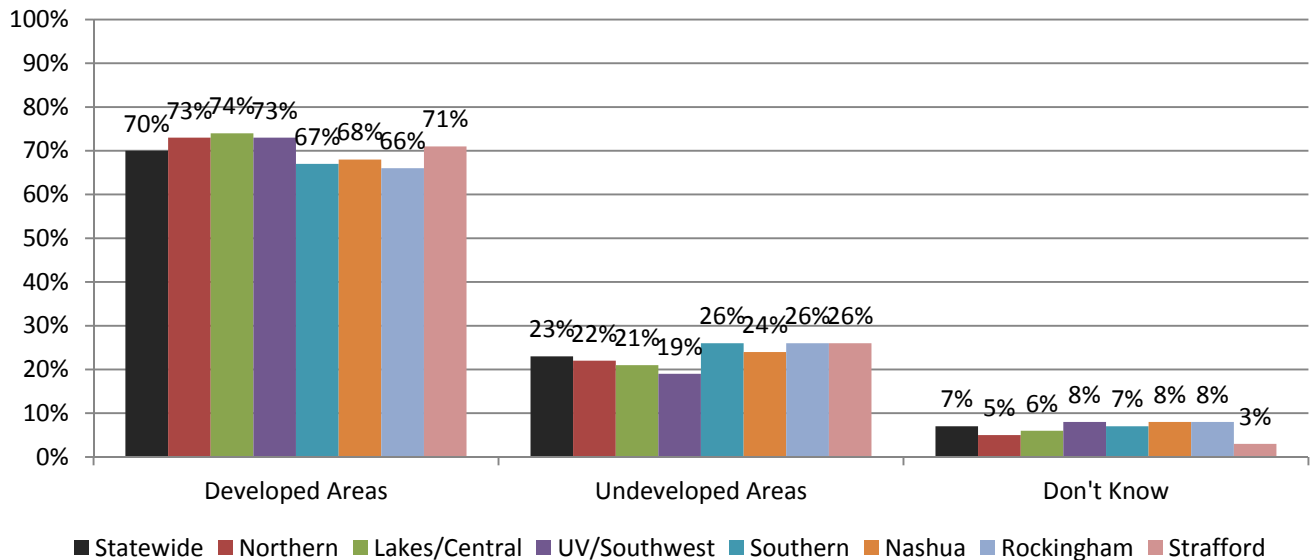

Only 9% of respondents find housing to be very affordable in their town, 56% find it somewhat affordable, 24% find it not very affordable, 5% find it not affordable at all and 6% don't know. When it comes to renting, only 7% find it very affordable, 39% find it somewhat affordable, 19% find it not very affordable, 7% find it not affordable at all and 27% don't know.

Figure 8: How Affordable is Housing in Your Town? (q4 & q5)

More than two-thirds (70%) or residents think that future development should occur in areas that are already developed while only 23% support development in undeveloped areas and 7% did not know.

Figure 9: Where should future development occur in your part of the state? (q8)

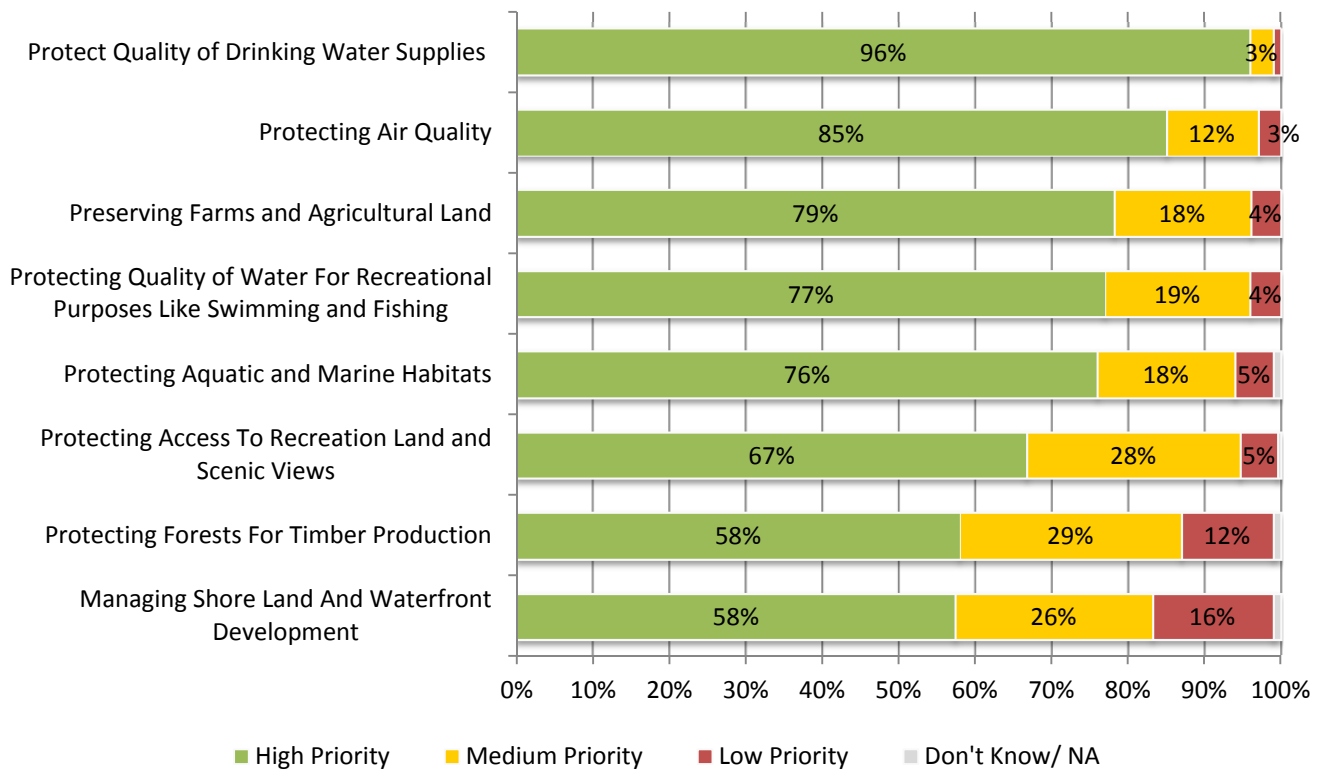

Environmental Protection

Nearly all residents (96%) view protecting water quality for drinking as a high priority for their community, followed by protecting air quality (85%), preserving farms and agricultural land (79%), protecting water quality for recreational purposes like swimming and fishing (77%), protecting aquatic and marine habitats (76%), protecting access to recreation land and scenic views (67%), protecting forests for timber production (58%), managing shore land and waterfront development (58%).

- Those who live in Northern NH are *more* likely to say that protecting forests for timber is a high priority.

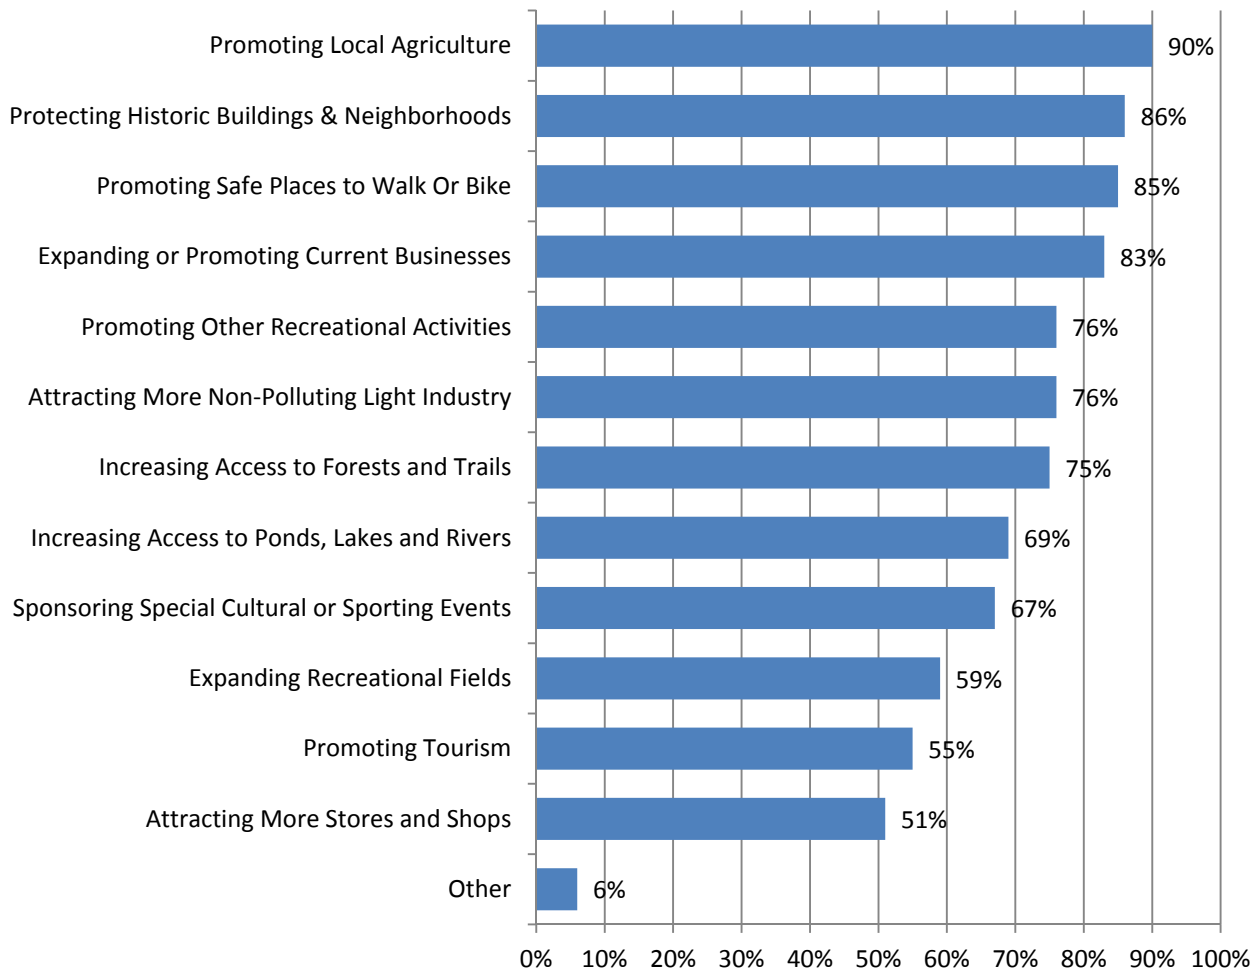

Figure 10: Priority Placed on These Community Issues (q9)

A large majority of residents (90%) say that promoting local agriculture should be actively encouraged in the community, followed by protecting historic buildings & neighborhoods (86%), promoting safe places to walk or bike (85%), expanding or promoting current businesses (83%), promoting other recreational activities (76%), attracting more non-polluting light industry (76%), increasing access to forests and trails (75%), increasing access to ponds, lakes and rivers (69%), sponsoring special cultural or sporting events (67%), expanding recreational fields (59%), promoting tourism (55%), and attracting more stores and shops (51%).

- Those who live or work in Northern and Central NH are *more* likely to say communities should actively encourage promoting tourism.
- Those who are non-white and households earning less than \$20,000 are *more* likely to say communities should actively encourage attracting more stores and shops.

Figure 11: What should be actively encouraged in your community? Check all that apply (q12)

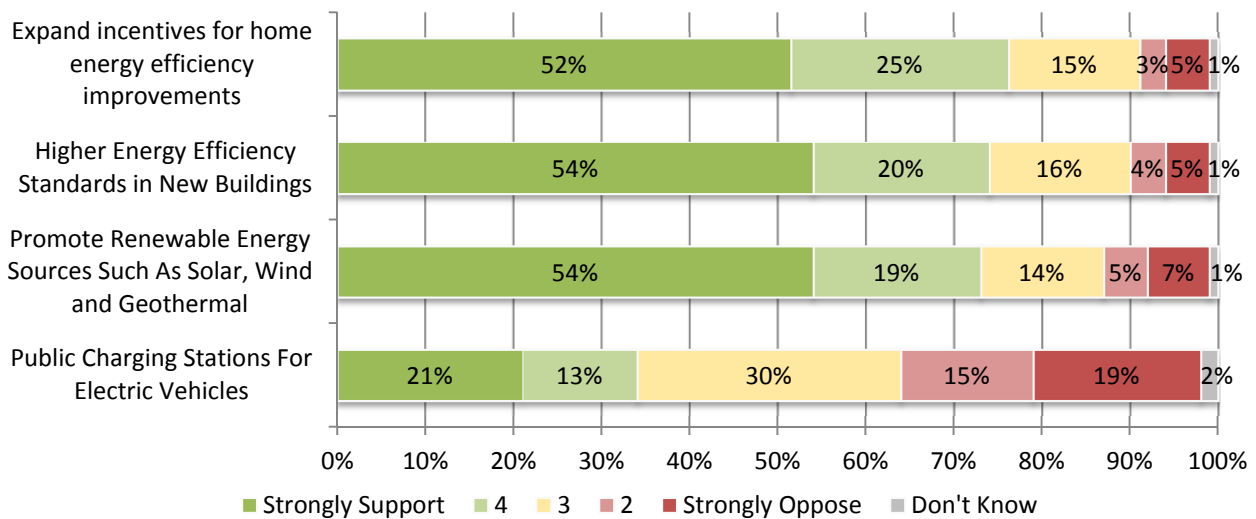

Energy Policies

Three in four residents (77%) support expanding incentives for home energy efficiency improvements (with 52% who “strongly support”), followed by higher energy efficiency standards in new buildings (74%), and promoting renewable energy sources such as solar, wind and geothermal (73%). Meanwhile only 34% were in support of public charging stations for electric vehicles.

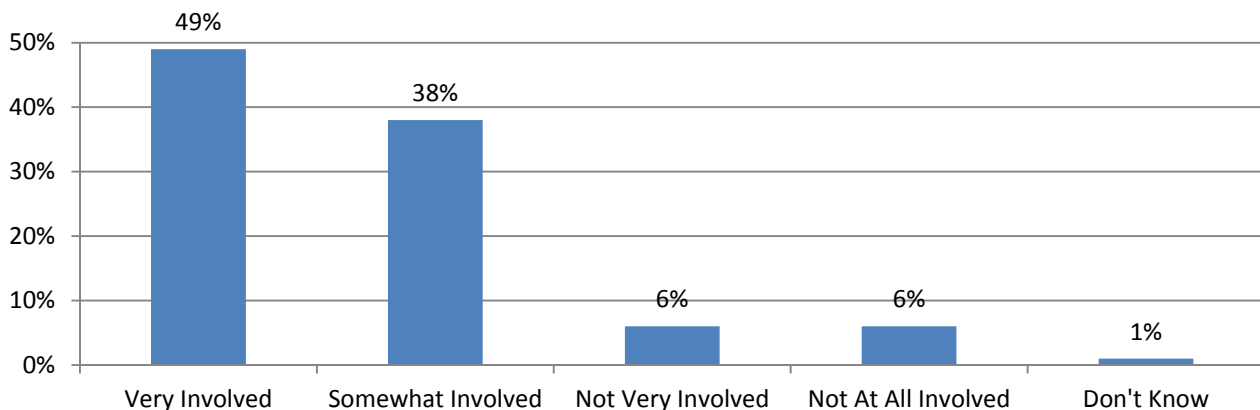

- Those who work at home are *more* likely to strongly support expanding incentives for home energy efficient improvements.
- Households earning less than \$40,000 are *more* likely to strongly support promoting renewable energy sources.

Figure 12: Support/Oppose Energy Policy Changes (q13)

Half of residents (49%) think that local governments should be very involved in guidelines for renewable energy (such as large wind farms), 38% think they should be somewhat involved, 6% think they shouldn't be very involved, 6% think they should be not at all involved and 1% don't know.

Figure 13: How Involved Should Local Governments Be In Guidelines For Renewable Energy? (q16)

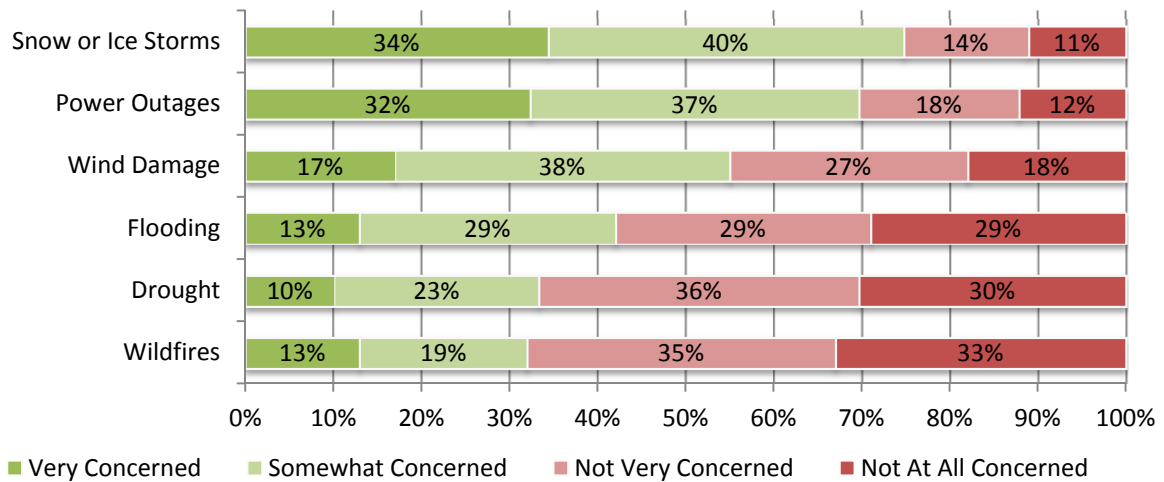

Emergency Preparedness

Nearly three in four (74%) residents are concerned (34% “very concerned” and 40% “somewhat concerned”) with snow or ice storms in their community followed by power outages (69%), wind damage (55%), flooding (42%), drought (33%) and wildfires (32%).

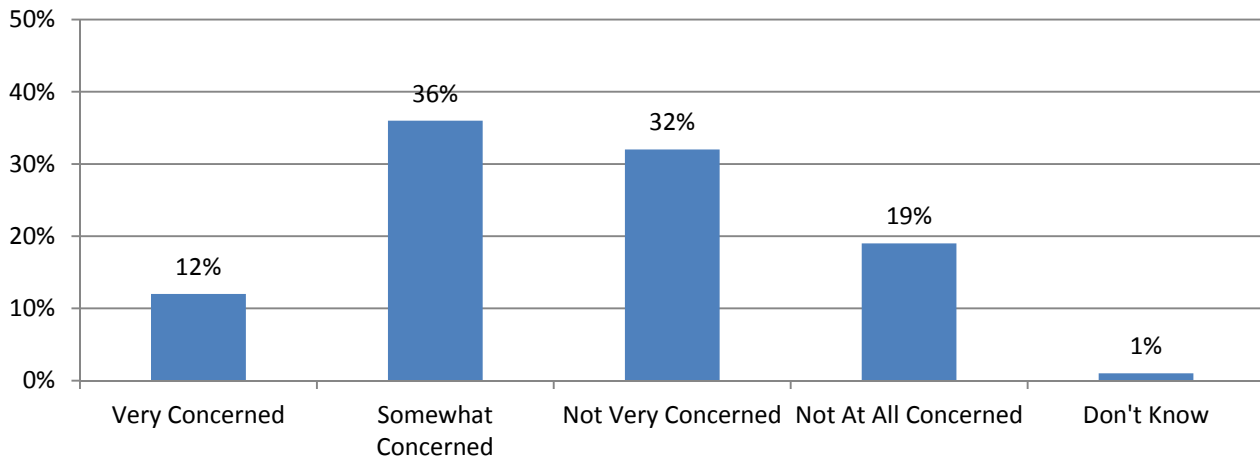

- Households earning less than \$20,000 are *more* likely to be very concerned about wind damage.
- Those who are non-white and households earning less than \$20,000 are *more* likely to be very concerned about snow or ice storms.
- Those who are 70 and older and those who are retired are *more* likely to be very concerned about wildfires.

Figure 14: How Concerned Are You About Weather Related Events In Your Community? (q14)

Only 12% of residents are very concerned about their community’s level of preparedness in weather-related situations, while 36% are somewhat concerned, 32% are not very concerned, 19% are not at all concerned and 1% said they don’t know.

Figure 15: Concerned about Your Community’s Level of Preparedness? (q15)

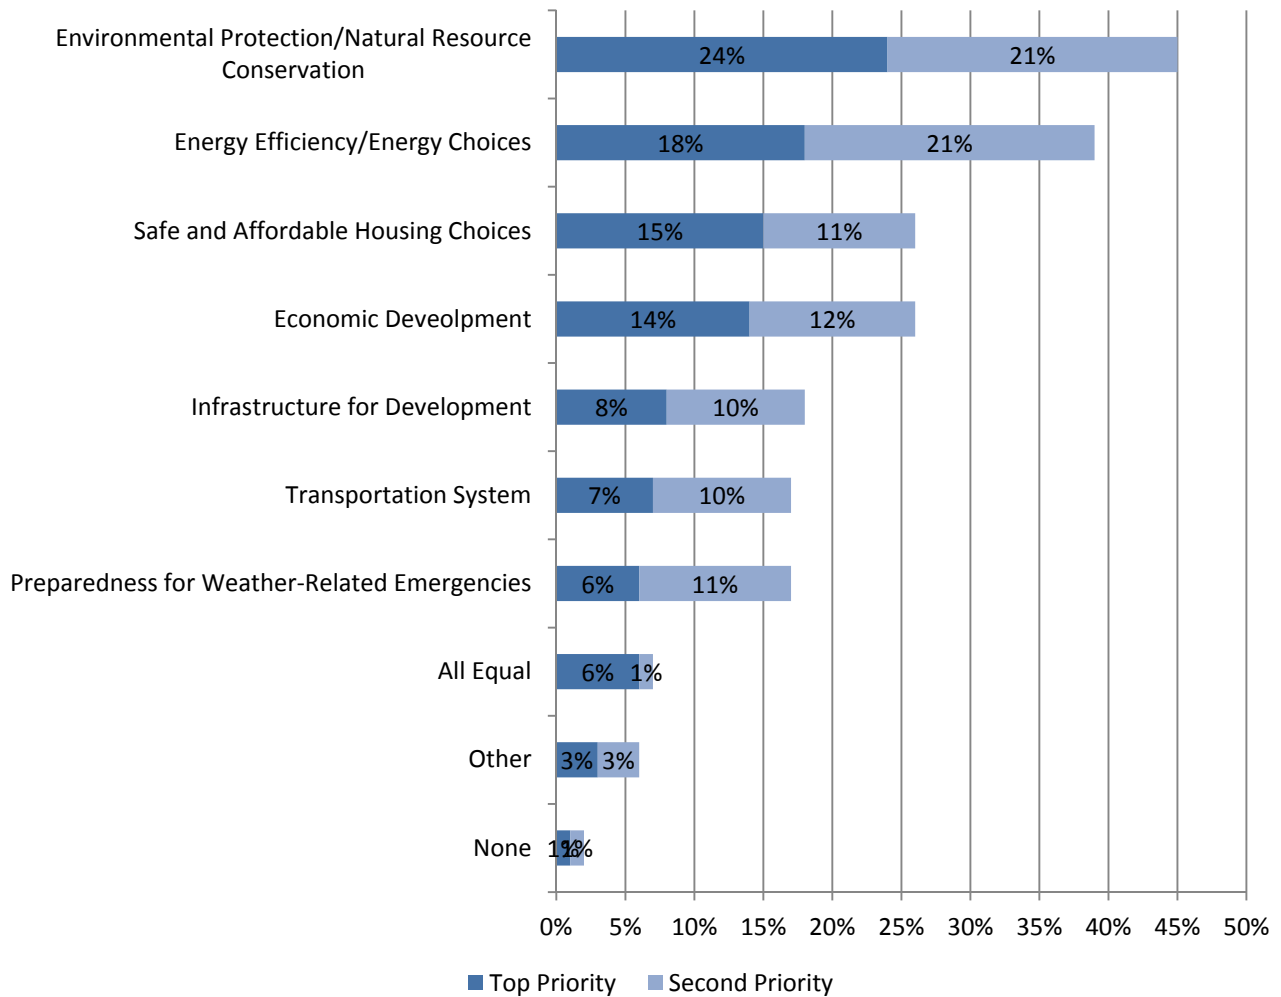

Priorities for Investing Public Dollars

Residents' top priority for investing public dollars is environmental protection (24%), followed by energy efficiency (18%), safe and affordable housing (15%), economic development (14%), infrastructure for development (8%), transportation system (7%), preparedness for weather-related or other emergencies (6%), all priorities are equal (6%), something else (3%) and none of the above (1%).

When the top two responses are combined environmental protection (45%) and energy efficiency (39%) are the two most cited priorities.

Figure 16: Priorities for Investing Public Dollars (q17)

Broadband

Nine in ten (91%) residents have internet access in their home, while just 9% do not (**Figure 11**). For those who do not have internet access at home, a plurality (26%) says that they don't have it because they don't need it, followed by it is too expensive (20%), they have access at another place like their job (9%), they don't have an adequate computer (9%), they don't know how to use it (8%), and that it is not available where they live (5%). There were also 21% who cited another reason and 2% who did not know (**Figure 12**).

- Those who are 70 or older, those with a high school education or less, those who are unemployed and looking for work and households earning less than \$20,000 are *less likely to have internet access at home*.

Figure 17: Do You Have Internet Access At Home?

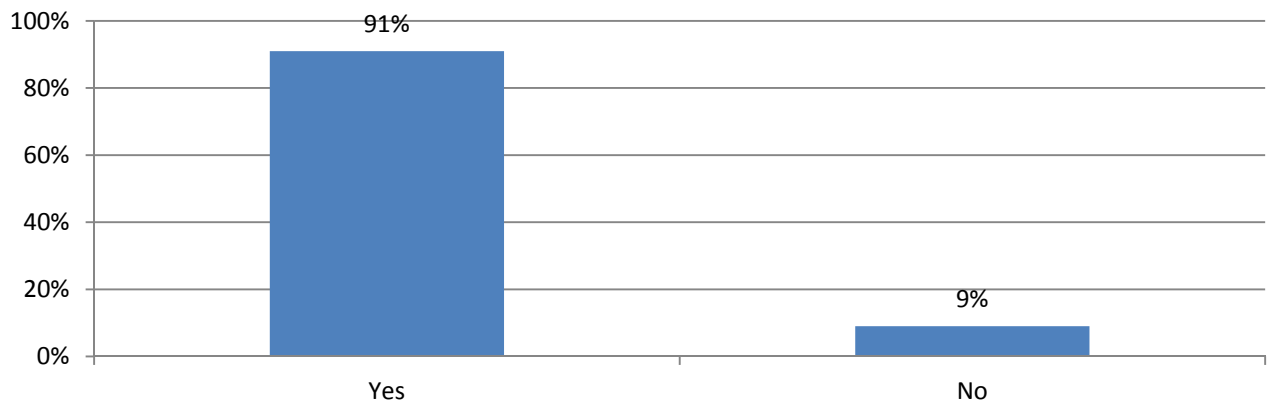

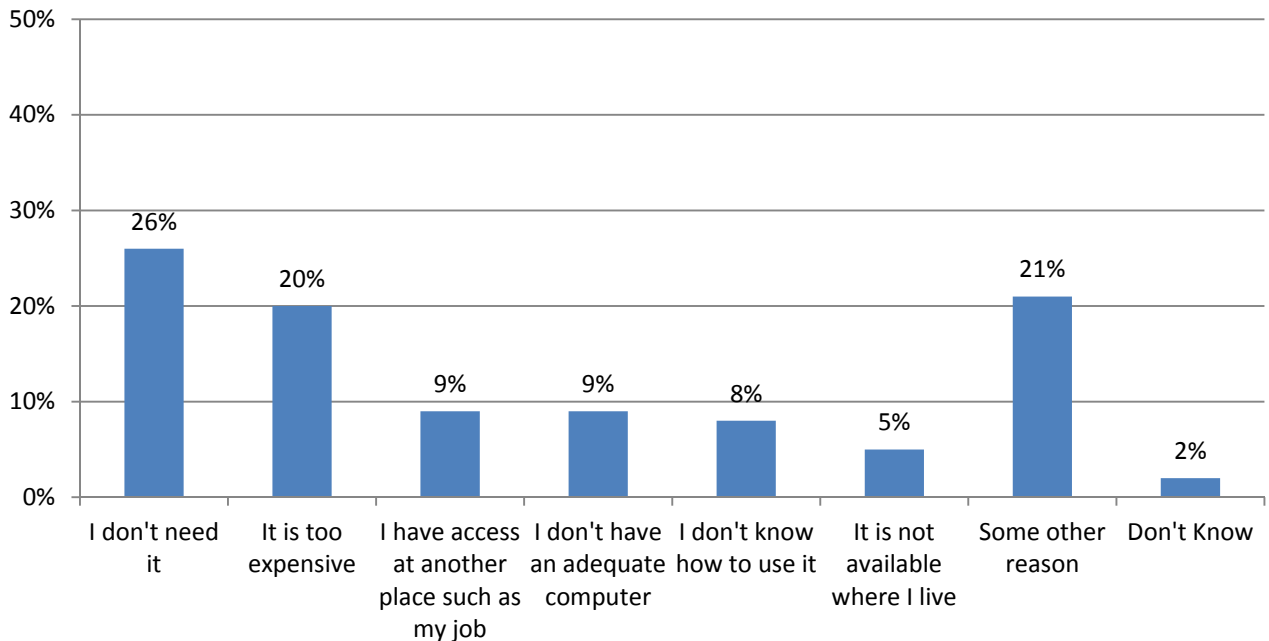

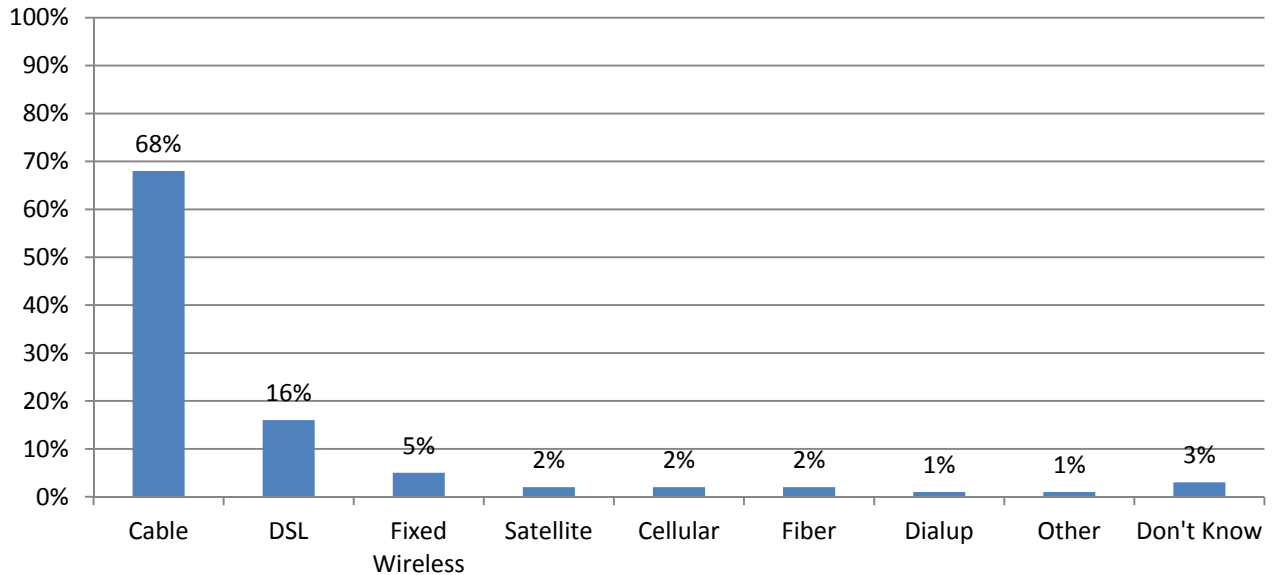

Figure 18: Most important reason why you don't have internet access at home?

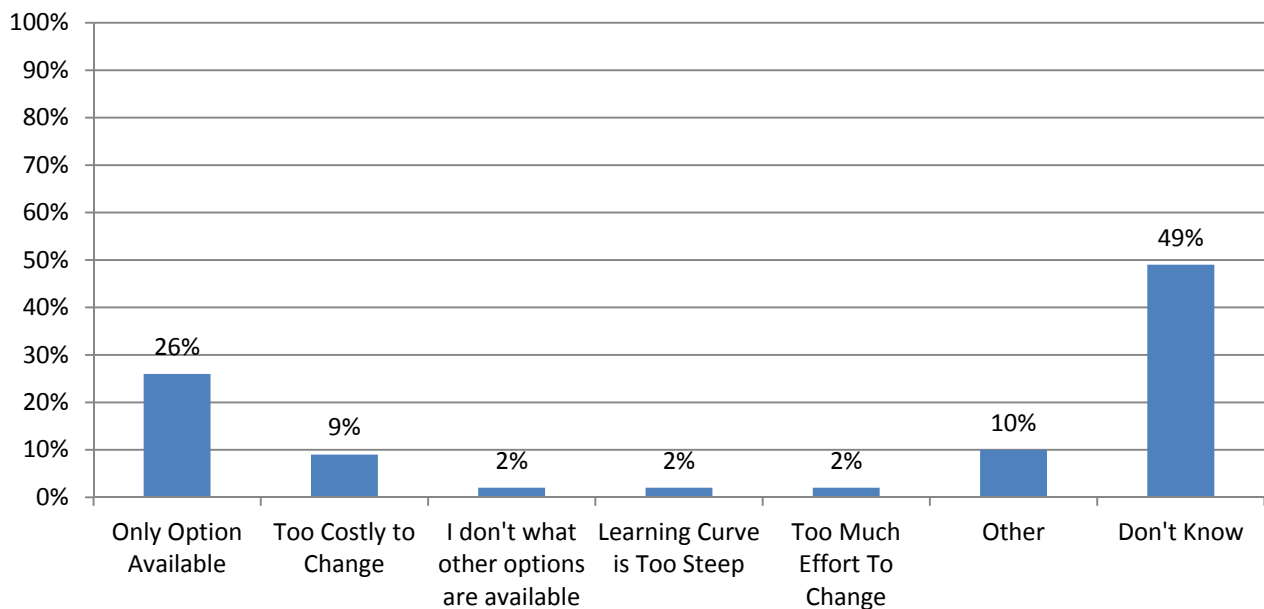

Over two-thirds (68%) of residents have a cable internet connection, followed by those with DSL (16%), fixed wireless (5%), cellular (2%), satellite (2%), fiber (2%), dialup (1%). There was also 1% who said they have had another type of connection (1%) and 3% didn't know.

Figure 19: What type of internet connection do you have at home?

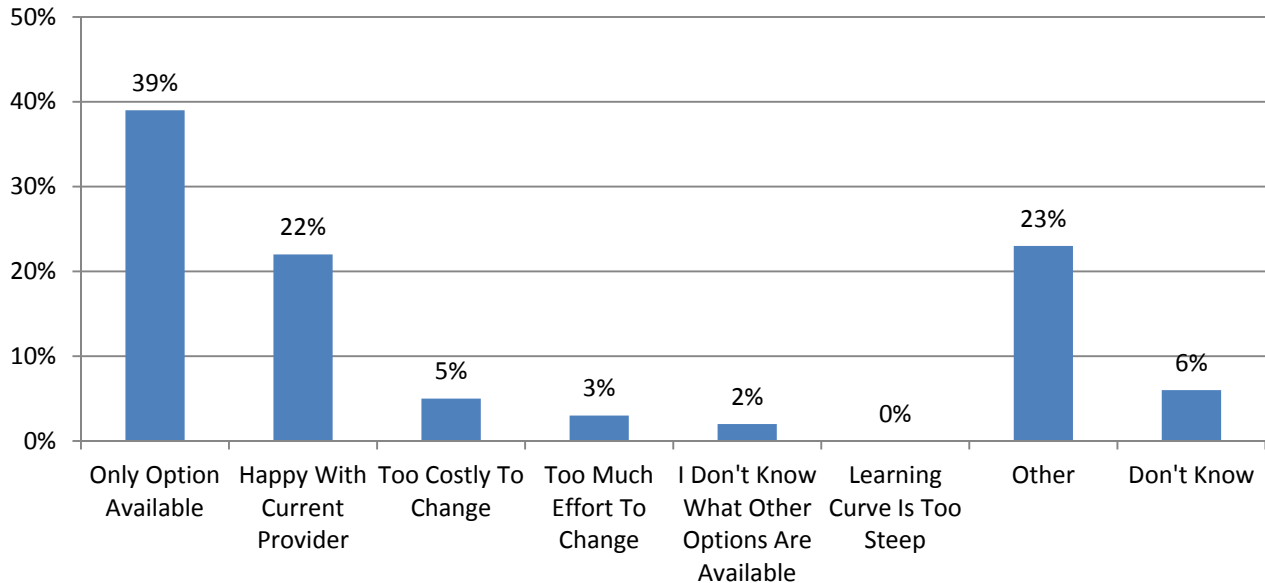

For those who do have a dialup or satellite connection, a plurality (49%) say that they don't know why, followed by it being the only option available (26%), it being too costly to change (9%), they don't know what the other options are available (2%), the learning curve is too steep (2%), and it is too much effort to change (2%). There were also 10% who had another reason.

Figure 20: If you are on dialup or satellite, why?

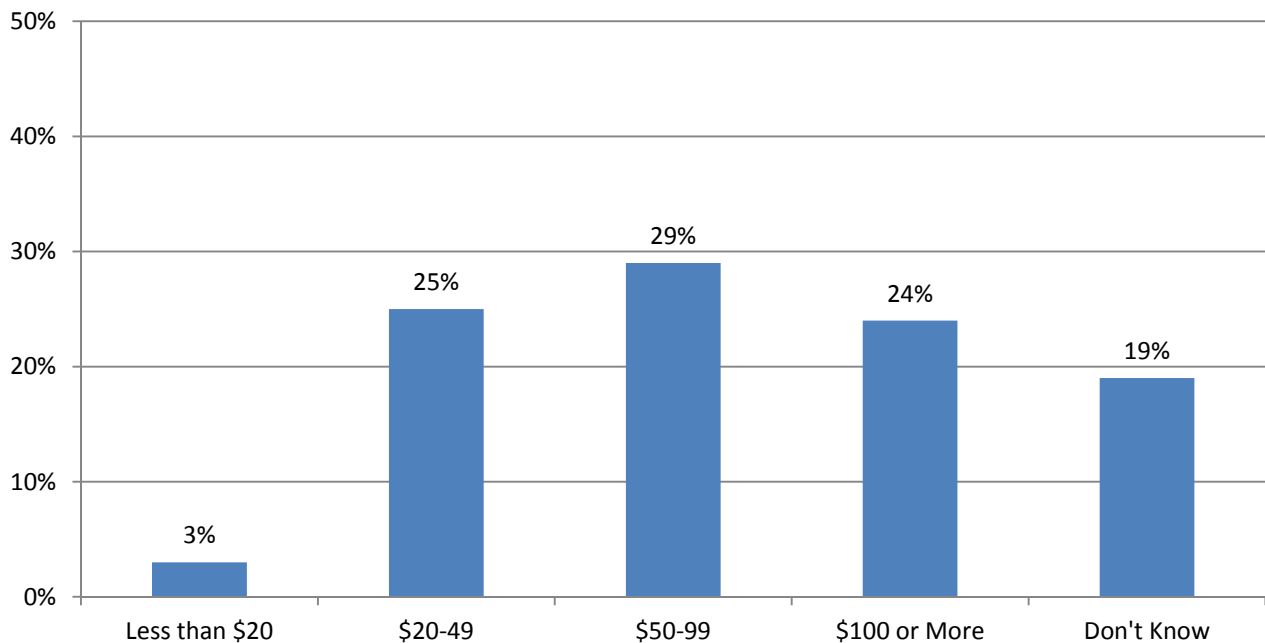

For those who don't have satellite or dialup, a plurality (39%) say that they have their current internet provider because it is the only option available, followed by being happy with their current provider (22%), it being too costly to change (5%), it being too much effort to change (3%), they don't know what other options are available (2%), there were also 23% who had another reason and 6% who didn't know.

Figure 21: Why Are You Using Your Current Provider?

Only 3% of residents say that their monthly internet bill is less than \$20, while 25% pay \$20-49 per month, 29% pay \$50-99 per month, 24% pay \$100 or more per month and 19% did not know.

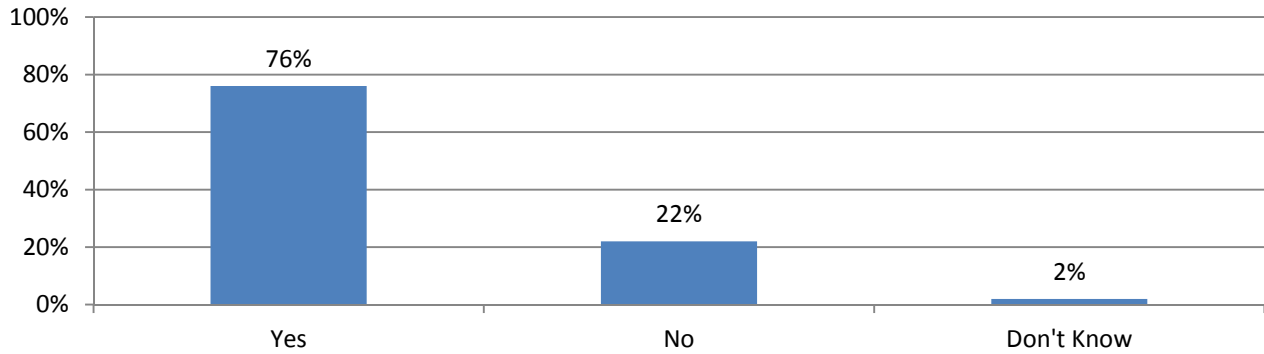

Figure 22: What is your monthly internet bill?

Over three-quarters of residents (76%) currently pay for a bundled internet service, followed by 22% who don't have a bundled service and 2% who did not know.

- Households earning less than \$20,000 are *less* likely to pay for bundled internet service.

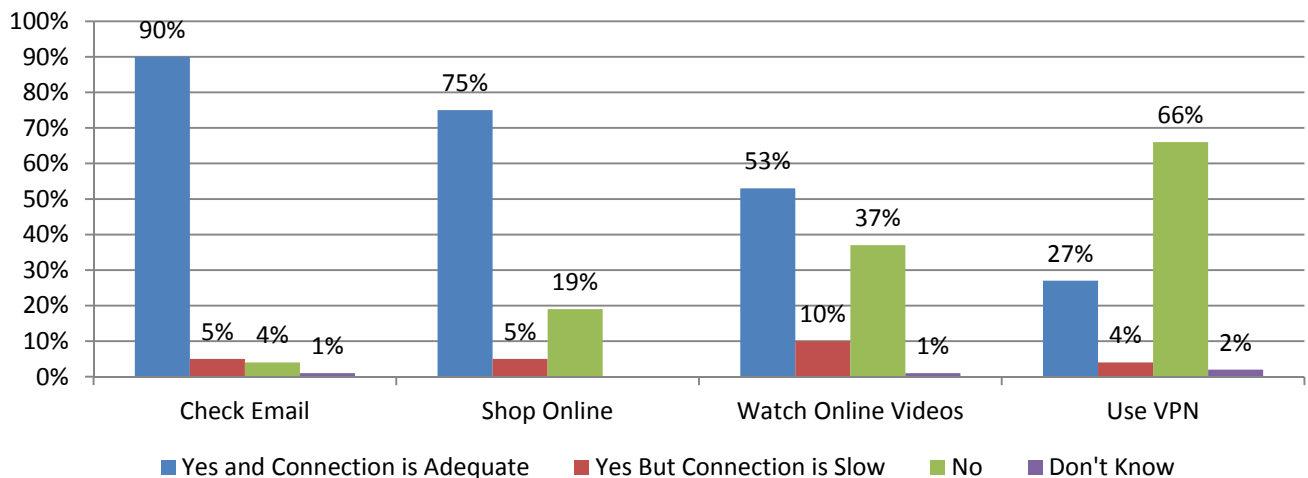

Figure 23: Do you pay for a bundled service?

A large majority (90%) of residents use their home internet to check email and their connection is adequate to do so, 75% shop online with an adequate connection, 53% watch online videos and have an adequate connection and 27% use VPN and have an adequate connection to do so.

- Those who are 70 or older, those who are retired, those with a high school education or less and households with an income of less than \$20,000 are *less* likely to shop online.
- Those who are 60 or older are *less* likely to watch on-line video. Conversely, those aged 18-39 are more likely to watch on-line video.
- Those with a postgraduate education and households earning \$160,000 or more are *more* likely to use a VPN at home. Those who are 70 or older, those with a high school education or less and those households earning less than \$60,000 are *less* likely to use a VPN.

Figure 24: What Do You Use The Internet At Home For

More than nine in ten (92%) residents state that their internet connection is adequate for their uses, followed by 7% who say their connection is not adequate and 1% who don't know (**Figure 19**). A large majority (86%) of residents would not be willing to pay more for faster internet speeds; 10% would be willing to pay 25% more per month, 2% would be willing to pay 50% more per month and 3% don't know (**Figure 20**).

Technical Report

How the Sample Was Selected

The New Hampshire Regional Planning Commissions A Granite State Future (GSF) Survey was a telephone survey of randomly selected adults in the state of New Hampshire. This survey was conducted using a procedure called Random Digit Dialing (RDD), of both landline and cellular telephone.

A sample of households in the area was selected by a procedure known as random digit dialing. The way this works is as follows. First, with the aid of a computer, one of the three digit telephone exchanges that are currently used in the state (e.g., 772) is randomly selected. The computer then randomly selects one of the "working blocks"--the first two of the last four numbers in a telephone number (e.g., 64)--and attaches it to the randomly selected exchange. Finally, the computer program then generates a two digit random number between 00 and 99 (e.g., 57) which is attached to the previously selected prefix (772), and the previously selected working block (64) resulting in a complete telephone number, i.e., 772 6457. This procedure is then repeated numerous times by the computer to generate more random numbers, so that we have a sufficient quantity to conduct the survey. The end result is that each household in the area in which there is a telephone has an equally likely chance of being selected into the sample. This procedure is done for both land line and cellular exchanges.

The random sample used in the GSF survey was purchased from Scientific Telephone Samples (STS), Foothill Ranch, CA. STS screens each selected telephone number to eliminate non-working numbers, disconnected numbers, and business numbers to improve the efficiency of the sample, reducing the amount of time interviewers spend calling non-usable numbers.

Each of these randomly generated telephone numbers is called by one of our interviewers from a centrally supervised facility at the UNH Survey Center. If the number called is found not to be a residential one, it is discarded and another random number is called. (Approximately forty-five percent of the numbers were discarded because they are found to be businesses, institutions, or not assigned.) If it is a residential number, the interviewer then randomly selects a member of the household by asking to speak with the adult currently living in the household who has had the most recent birthday. This selection process ensures that every adult (18 years of age or older) in the household has an equally likely chance of being included in the survey. No substitutions are allowed. If, for example, the randomly selected adult is not at home when the household is first contacted, the interviewer cannot substitute by selecting someone else who just happens to be there at the time. Instead, he or she must make an appointment to call back when the randomly selected adult is at home. In this way, respondent selection bias is minimized.

When the Interviewing Was Done

New Hampshire adults in the GSF survey were interviewed between May 9 and July 6, 2013. Each selected respondent was called by a professional UNH Survey Center interviewer from a centrally supervised facility at the UNH Survey Center. Telephone calls during the field period were made between 9:00 AM and 9:00 PM.

Response Rates

Interviews were completed with 2,935 randomly selected adults in New Hampshire from a sample of 25,114 randomly selected telephone numbers. Using American Association for Public Opinion (AAPOR) Response Rate 4, the response rate for the Granite State Future survey was 33% percent. The formula to calculate standard AAPOR response rate is:

$$\frac{I}{(I + P) + (R + NC + O) + e(UH + UO)}$$

I=Complete Interviews, **P**=Partial Interviews, **R**=Refusal and break off, **NC**=Non-Contact, **O**=Other, **e**=estimated portion of cases of unknown eligibility that are eligible, **UH**=Unknown household, **UO**=Unknown other.

Weighting of Data

The data have been weighted to account for known biases of telephone surveys. The data in the Granite State Future survey are weighted by the number of adults and telephone lines (landlines and cell phones) within households to equalize the chances that any one adult would be selected for inclusion. The data are also weighted by respondent sex, regional planning commission, and age of respondent.

Sampling Error

The Granite State Future survey, like all surveys, is subject to sampling error due to the fact that all residents in the area were not interviewed. For those questions asked of five hundred (500) or so respondents, the error is +/- 4.4%. For those questions where fewer than 500 persons responded, the sampling error can be calculated as follows:

$$Sampling\ Error = \pm 1.96 \sqrt{\frac{P(1 - P)}{N}}$$

Where P is the percentage of responses in the answer category being evaluated and N is the total number of persons answering the particular question.

For example, suppose you had the following distribution of answers to the question, "Should the state spend more money on road repair even if that means higher taxes?" Assume 1,000 respondents answered the question as follows:

YES	47%
NO	48%
DON'T KNOW	5%

The sampling error for the "YES" percentage of 47% would be

$$\pm 1.96 \sqrt{\frac{47(53)}{1000}} = \pm 3.1\%$$

for the "NO" percentage of 48% it would be

$$\pm 1.96 \sqrt{\frac{48(52)}{1000}} = \pm 3.1\%$$

and for the "DON'T KNOW" percentage of 5% it would be

$$\pm 1.96 \sqrt{\frac{5(95)}{1000}} = \pm 1.4\%$$

In this case we would expect the true population figures to be within the following ranges:

YES	43.9% - 50.1% (i.e., 47% ±3.1%)
NO	44.9% - 51.1% (i.e., 48% ±3.1%)
DON'T KNOW	3.6% - 6.4% (i.e., 5% ±1.4%)

Q12 "Which of the following things should be actively encouraged in your community?" (Other Responses)

- A hotel or something
- Active police department
- Adolescent entertainment/recreation- specifically for more like 13/14-20 year olds
- Affordable apartments for restaurant & tourist industry workers
- Affordable housing is an issue, people who are working a minimum wage can't afford a place to live
- Affordable housing, 2000sq foot home, need to stop spending needlessly, need relief
- All of the above
- All of the above
- Alternative energy sources
- Art
- Art and music in school
- Attracting younger people to work in existing factories
- Best way to improve, should lower cost of living.
- better housing subsidies to prevent bad neighborhoods
- Better control of student population; alcohol abuse amongst students
- Better road maintenance capabilities
- Bike lanes on the roads
- Bike paths.
- Bike routes
- Bike trails connecting towns
- Casinos--advocate that
- Change to a flat tax

- Charging people to go into places so they have more respect to keep them clean
- Coastline should be carefully redeveloped.
- Communication
- Community center, parks and recreation for children
- Community Gardens
- complete streets, artist communities, energy efficiency
- conservation
- continuation & strengthening of planning /zoning board in Nashua
- Create a lake (laughs)
- Dirtbikes and Fourwheeler trails
- Education is probably my thing
- Encourage low density housing, I believe the town is developing way too fast, no infrastructure for it and taxes will be increased. I moved to Londonderry and I don't want to live in a city.
- Encourage the growth of sidewalks
- Encouraging high tech industry
- energy efficiency
- enforce speed limits
- Everything on the list
- Expanding beach access
- Farmers markets
- Farming!
- For a rural area , our police dept. is way too big
- Four seasonal recreation
- Gambling casino & road repair
- Getting kids involved in sports or other activities in the summer or off school
- He is worried about the side effects. He thinks the choices are great but there are many side effects. He is worried about the costs of all these things.
- he'd like to see lower taxes
- higher tax on cigarettes, gas, sales tax and income tax
- Horseback riding
- I don't think the municipality should promote anything
- I live in an area away from center of town, no sidewalks to walk on, in winter its dangerous, if that type of facility were to be expanded that would be very important
- I'd like to see some senior housing at an affordable rate
- I'm for anything that's cultural and we have enough development
- Improving the schools
- Increase activities/opportunities for kids ex. skate parks, bowling alleys...etc.
- Increase in alternative forms of energy like wind power and solar.
- Indoor recreation facilities for children
- it should be the priority of the state to protect the green lands that we have and not let the power companies destroy it
- Job Opportunities
- Keeping taxes low. Making a favorable business environment.
- larger tax base

- less noise pollution
- Libraries
- library, historical society, senior center and other organizations
- lower taxes
- lower taxes
- Mainly sidewalks and bike paths - Commute now is slightly/ very dangerous
- Maintaining clear air, water, and natural beauty, which is becoming rarer around here. In this area, We need to preserve the wholesome, rural recreation atmosphere that makes the region so pristine and appealing.
- Maintaining what we have
- Mandatory single stream recycling; increased focus on preventing domestic violence
- More affordable housing for the elderly
- More alternative energy sources
- More attention paid to rural roads and traffic, rural areas stuck with bad roads, unsafe roads even
- More communication from the local government.
- More community gardens
- More for the teenagers to do - access to volleyball and other activities. Also more for the elderly - places to go & access to get there; seniors should have much more help than they're getting. Also, medical costs need to come down, especially for medications. Also higher wages, lower cost for groceries & gas.
- More horseback riding trails, and legalize gambling in NH
- More independent with alternative energy sources- more power sources
- more mitigation
- More police presence.
- More recycling
- More trails, but for noiseless activities like walking or biking, not vehicles like ATVs.
- Most of it we already have... I wish they could come up with a way to do something about, like, more Natural resources for heat and stuff like that. and if you live in Keene
- Natural energy resources
- Natural gas expansion
- Need to increase access to public transit throughout the community and to other cities, like Nashua, Manchester & Keene, and smaller surrounding towns, as well as to cultural & sporting events. Different parts of town are too far dispersed and need to be connected by public transportation for public social gatherings (dinners, etc.) and getting into town. We also need more affordable housing for working people and seniors.
- No more spending of money we don't have
- No safe trails for walking/biking to different towns. this needs improvements
- of grid utilities, such as solar and wind
- People in power promoting working with large national businesses (bowling, bmw, kai, Honda, Mercedes) to bring more jobs into the state
- playgrounds/areas
- Possibly adult education
- preservation of natural resources
- Preserving lakes. reducing housing around lakes.
- preserving the farm lands that are currently here
- Private Landowners rights
- Promote ATV recreation
- promote the casino moving into Salem

- Promoting Arts
- promoting community gardens
- Promoting recreational boating, hunting, and fishing along with responsible conservation.
- Property owners rights

- protecting natural resources for animal habitats, and preservation of nature
- protection from mosquitos
- Protection of Wildlife
- public transportation
- Public transportation
- Rails to trails should be promoted more.
- recreational indoor/community centers
- Recreational spots should be improved a little bit, sanitizer, add bathrooms to spots.
- reducing energy consumption
- Safer environment for the kids, both in school and in regular life
- Said she has everything. believes everyone should live in Kingston
- Sidewalks and street lamps
- Social Programs need to be revamped: welfare should be to help not to support.
- Spending gov't money to encourage greater involvement
- stop trying to do so much
- Stop wasting money!
- support community-based family-run businesses; no big box stores
- Swimming Facility
- teaching teachers to be better teachers, give tax breaks to homeschoolers, improve community psychological evaluations
- the arts and music
- The Northern Pass should be stopped before it ruins all of the North Country
- The Performing Arts.
- The town of Derry must focus on existing residential neighborhoods, and improving zoning laws. Taxes need to be lowered.
- To do these w/o impinging on ind.'s right
- town recycling
- Town Tennis Courts
- transportation for the elderly
- Use of solar energy
- very slow, contained development, both residential & business
- We need a new Community Center, the current one is falling apart-intergenerational Community Center
- wellness
- wind power
- Work on Trash Pickup and recycling system and more sidewalks
- yes to cultural events, no to sporting events

- Healthcare
- Healthcare Improvement
- helping the homeless
- I suppose none of this makes a difference if people can't afford to live
- I think a big priority is needs for people in the medical and health care field, big problem, it's not going to get any better not the way things are going anyway
- I think New Hampshire's public school funding through local taxes is difficult for Communities, need more funding from the State and Federal levels.
- I would like to see a natural gas line along U.S. Rte. 1-It is in Seabrook currently, but is not as far North as Hampton Falls
- I would to see towns more connected, either through train or bus
- jobs
- Jobs
- local education
- Maintenance of infrastructure
- maintenance of roads
- Making sure that education has the funding, (and not just money) and everything that the system needs
- Medical
- More oversight on government spending.
- more public access for shooting pheasants
- Mosquito spraying
- No second priority
- organic food is first concern, natural resources, energy efficient, "being green"
- Other
- pedestrian travel, bikeways
- Personal liberty and freedom!
- police protection and fire protection
- preserving open space and wild land

- Preserving the lifestyle we've already established. we don't need more development
- Promoting community from economic to things going on in the town and things to do like events and music.
- public safety and education
- public safety, for police to put criminals away
- Public School Systems
- Quality Schools
- recreation
- reduce taxes
- reduce the input of politics for the community--not close the door for the community--don't wreck it

Net5 “Why are you using your current provider?” (Other Responses)

Provider	Reason
actually we're in a zone... alright, we have MSN, but we're actually in a zone where we can pick up where I am, I can pick up like, satellite.. stuff.	I got rid of the internet because all the kids did is go on stinkin' facebook anyway, and they kept giving me viruses, so I said okay, I'm done, and they can do it on their phone and I can do it on school, so it doesn't matter to me
