Executive Summary

During May-July 2013, the University of New Hampshire Survey Center conducted a survey for New Hampshire's nine Regional Planning Commissions, as part of the *Granite State Future* and *New Hampshire Broadband Mapping and Planning* initiatives. Funded in part by a grant from the US Department of Housing and Urban Development, *A Granite State Future* is intended to engage New Hampshire citizens in a public dialogue, at the local, regional and state levels, about what they want for the future of their communities and state. Results from the survey will inform updates to the Regional Master Plans in each of NH's nine planning regions. These regional plans, whose development has been required under State law (RSA 36:47) for over 40 years, are advisory documents designed to provide municipalities with data and strategies to support local decision-making as well as enhance regional cooperation.

With support from the National Telecommunications Information Administration of the US Department of Commerce and in conjunction with the University of New Hampshire and other partners, the New Hampshire Broadband Mapping and Planning Program (NHBMPP) is a comprehensive, multi-year effort that seeks to understand where broadband is currently available in NH, how it can be made more widely available in the future, and how to encourage increased levels of broadband adoption and usage. Results from the survey will inform the broadband plans developed in each of NH's nine planning regions.

The specific areas of interest are New Hampshire resident's opinions on a range of issues facing communities around the State – transportation and broadband infrastructure, housing, economic development, natural resource management, energy and natural hazard mitigation. A survey of two thousand nine hundred and thirty-five (2,935) New Hampshire adults was conducted by telephone between May 9 and July 21, 2013. The response rate was 33% and the margin of sampling error for the survey is +/- 2.2%. (See Technical Report for a more detailed description of survey methods.) The following figures display survey results, detailed tabular results can be found in Appendix A, Appendix B contains the open-ended responses and Appendix C contains the survey instrument.

The intent of this report is to provide NH's regional planning commissions and other interested parties with a broad overview of the data collected. This report should serve as a concrete focus for engaging with these data and using them to design and implement strategies for regional planning. However, every summary statement made in this report will generate numerous questions from the reader about how this data element or piece of information applies to other specific strata of the population or planning domain. Many of these questions can readily be answered by the extensive cross tabulations that are provided for each survey question in Appendix A of this report. Some of the questions that will be generated by this report will require more extensive and sophisticated analyses of these data. Knowing this, it is our hope that New Hampshire Planning leaders will share these data with other academics and community organizations that will actively use these data to help New Hampshire discover more about their local population and about how better to target planning initiatives to meet the needs of those in specific communities.

Each section begins with a summary narrative that is written in the form of short, bulleted sentences that describe selected indicators on the data tables and charts. These narratives are not intended to explain or summarize every indicator in the accompanying data tables. This section was not meant to provide the reader with any conclusions. It was intended to spark interest in the data and invite you to ask questions of

this information and use the data cross tabs accompanying this report to understand better the planning concepts you are concerned about.

The charts and tables that follow display major findings of the survey. They are not intended to exhaustively present all the data in the survey. If no demographic differences were listed then responses were consistent across demographic categories. Not all findings are noted in this report; these are the highlights of the results. Additional results can be found in the detailed tables located in Appendix A.

Key Findings

- Responses from residents of the Southern Region were largely similar to those of statewide residents. The big differences involved what type of neighborhood residents live in (more Southern residents live in developments away from the town center) and the type of internet connection that residents have (more Southern residents have cable internet).
- Residents believe that environmental protection and natural resource protection should be the top priority for investing public dollars, and a majority believes that all environmental protection measures mentioned should be high priorities for policymakers.
- Residents view energy efficiency and energy choices as the second most important priority for investing public dollars. Residents are largely in favor of all the proposed energy efficiency and renewable energy projects, except for the idea of having public charging stations made for electric vehicles.
- Residents view safe and affordable housing as the third most important priority for investing public dollars. The development of single family housing and assisted living facilities were particularly favorable to residents while development of manufactured housing and apartments were the least favorable.
- Residents say that the top activity that their community should actively encourage is protecting historic buildings and neighborhoods (90%). Majorities want to encourage many other activities as well, including promoting local agriculture (89%) and promoting safe places to walk or bike (89%).
- Residents view quality schools as the most important thing to have in their community (94%). Other important aspects of a community include having nearby job opportunities (89%), small businesses and retail stores (85%), grocery stores (83%) and cultural and recreation facilities (81%).
- Residents view maintaining our bridges and highways to be the most important priority for transportation funding (73%). Residents were split on funding for other transportation initiatives, with a narrow majority favoring funding for senior and special needs transportation (56%), the availability of bike paths (55%), and expanding bus or rail service for commuting between major cities (52%).
- The vast majority of residents (93%) have internet access at home, and almost all of them (94%) consider their internet access adequate for their uses. Almost as many (87%) would not be willing to pay any additional money in exchange for faster internet speeds.

Demographics

Sex	South	State
Male	48%	49%
Female	52%	51%
Age of Respondent		
18 to 29	19%	19%
30 to 39	16%	15%
40 to 49	23%	20%
50 to 59	18%	20%
60 to 69	14%	14%

Hillsborough County	44%	22%
Seacoast	22%	20%
Other State	17%	19%
Work At Home	9%	12%

Housing

A plurality of residents (38%) describe where they live as a development away from a town center, followed by those in a neighborhood close to a town center (34%), a rural location away from the town center (20%), and in downtown or a town center (7%).

- Residents of the Southern region are *more likely* to live in a development away from the town center than statewide residents.
- Those aged 30 to 39 are *more likely* to live in a neighborhood close to the town center, while those aged 40 to 49 are *more likely* to live in a development away from the town center.
- Households earning between \$20,000 and \$59,999 are *more likely* to live downtown or in a town center.

Figure 1: How would you classify the neighborhood where you live? (q1)

When asked whether they would prefer to live in a small house but have a short commute to work or a large home with a longer commute, a majority (55%) said they would prefer the small home and short commute, 43% would prefer the large home and long commute and 2% did not know (**Figure 2**).

Meanwhile, a majority of residents (61%) would prefer to live in a strictly residential neighborhood while 38% would prefer a mixed residential/commercial neighborhood and 1% did not know (**Figure 3**).

- Households with two or more children, households earning between \$90,001 and \$160,000, those who have done postgraduate work and non-white residents are *more likely* to want a larger home with a longer commute.
- Older adults (70 and older), those who are retired and not working and households earning less than \$40,000 are *more likely* to choose a smaller home with a shorter commute.
- Households earning less than \$40,000 or over \$160,000 are *more likely* to want to live in a mixed residential/commercial neighborhood.

Figure 2: Large Home with Long Commute or Small Home with Short Commute? (q7a)

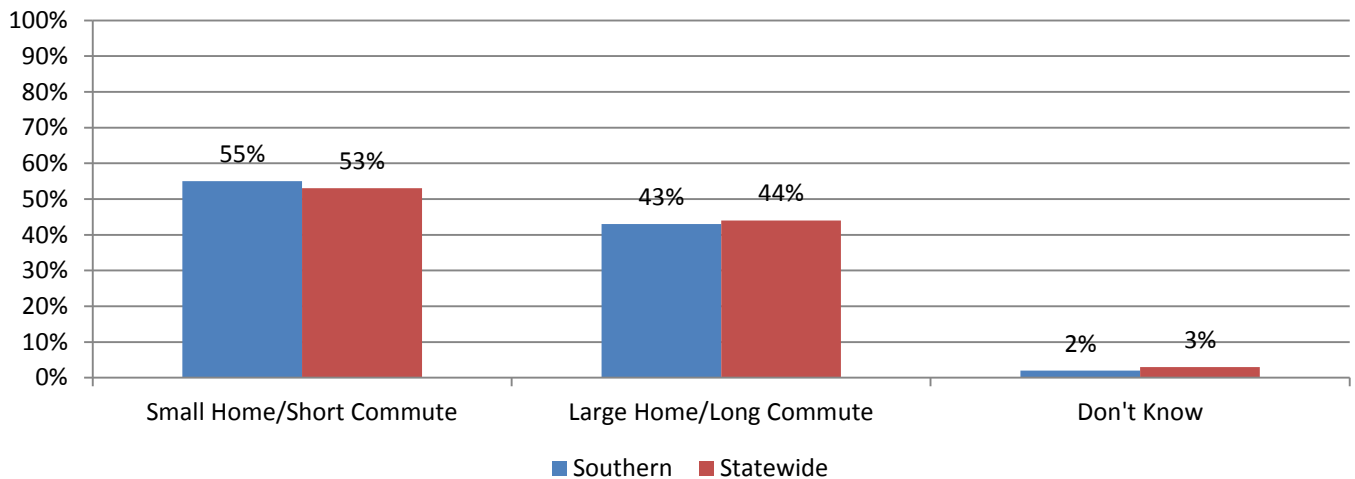

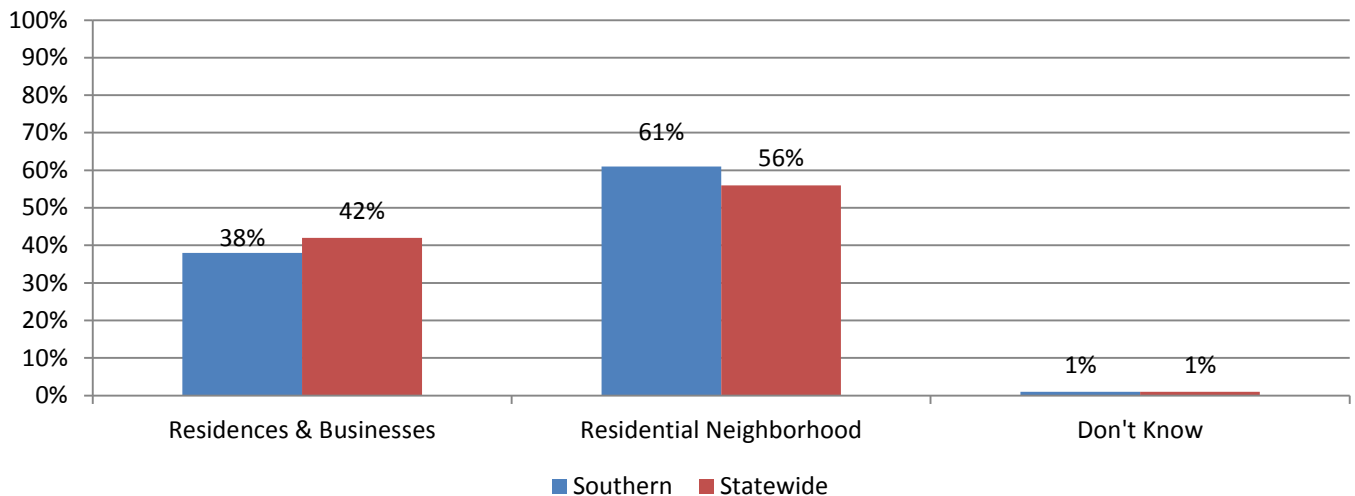

Figure 3: Mixed Neighborhood with Stores or Residential Only Neighborhood? (q7b)

Three-quarters (76%) of those who answered that they would like to live in a neighborhood with a mix of residences and businesses would prefer a smaller house with a short commute. A majority (57%) of those who chose a residential neighborhood where you have to drive to services also prefer a larger house with a longer commute.

Table 1: Living Preference – Home Size and Commute vs. Type of Neighborhood

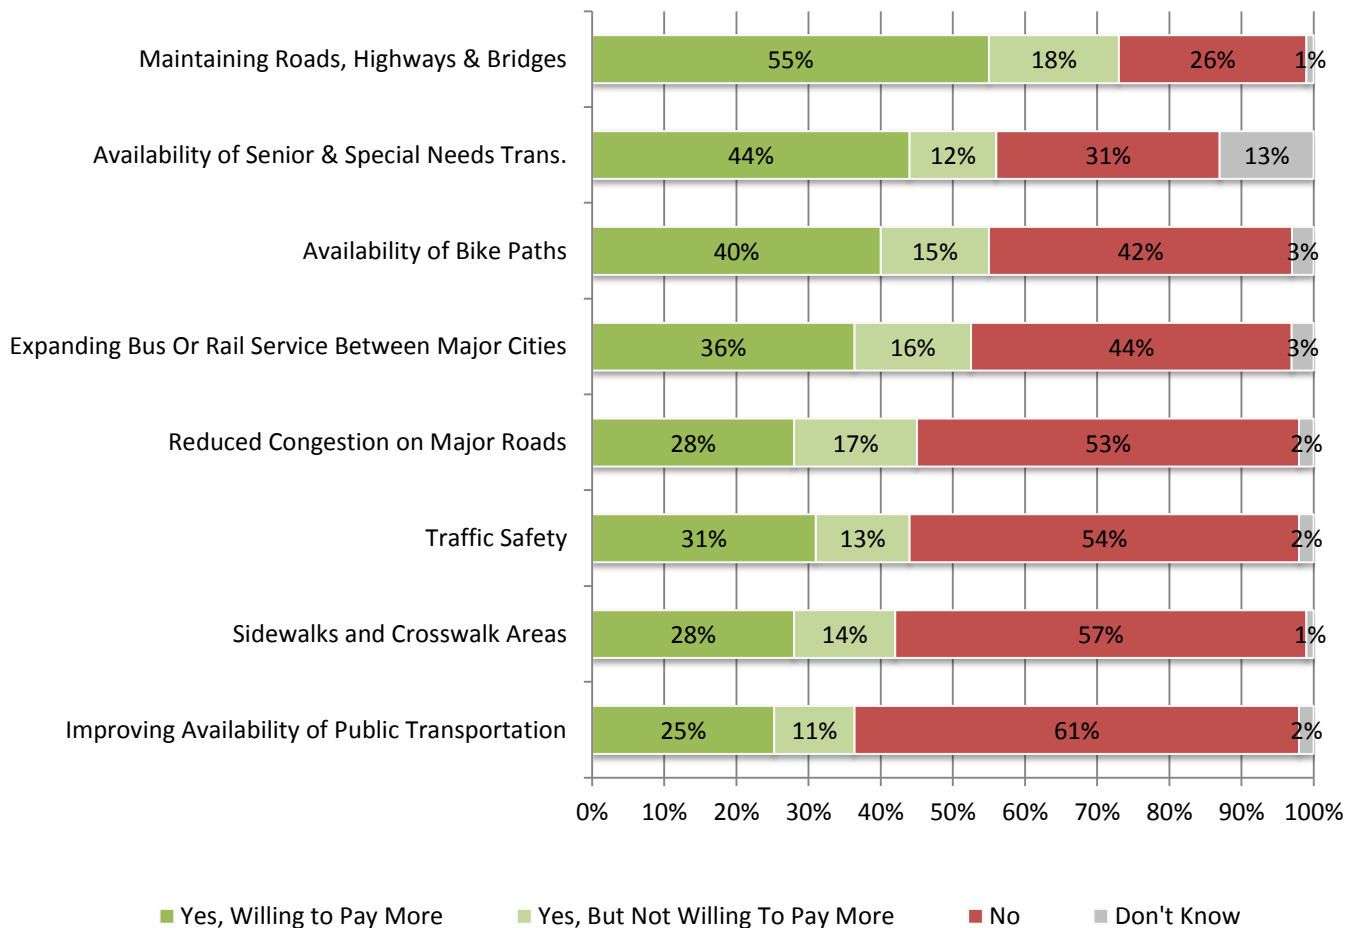

Q7A Would you choose to live in a small home with a small backyard, if it means you have a short trip to work, school or shopping, or would you choose to live in a large home with a large backyard, with a long trip to work school or shopping.	Q7B Would you choose to live in a neighborhood with a mix of residences and businesses where you can walk to stores, schools, and services, OR would you choose to live in a residential-only neighborhood where you needed to drive a car to get to stores, schools and services?		
	Mix of residences and businesses - walk	Residential neighborhood - drive	Total
Small home, small yard	76% (114)	43%(102)	56% (216)
Large home, large yard	24% (36)	57% (133)	44% (169)
Total	39% (150)	61% (235)	100.0% (385)

Transportation

Nearly three-fourths (73%) of residents think that policy makers should invest more money in maintaining roads, highways and bridges (with 55% willing to pay more in taxes to do so), followed by improving availability of senior and special needs transportation (56%), availability of bike paths (55%), expanding bus or rail service between major cities (52%), reduced congestion on major roads (45%), traffic safety (44%), sidewalks and crosswalk areas (42%), and improving the availability of public transportation (36%).

- Households earning less than \$20,000 are *more likely* to want investment in improving the availability of public transportation.
- Households earning over \$90,000 are *more likely* to want investment in the availability of bike paths.
- Household earning less than \$20,000, those aged 30 to 39 and those who have lived in New Hampshire for 6-10 years are *more likely* to want investment in sidewalks and crosswalk areas.

Figure 4: Should Policy Makers Invest More Money in Transportation (q2)

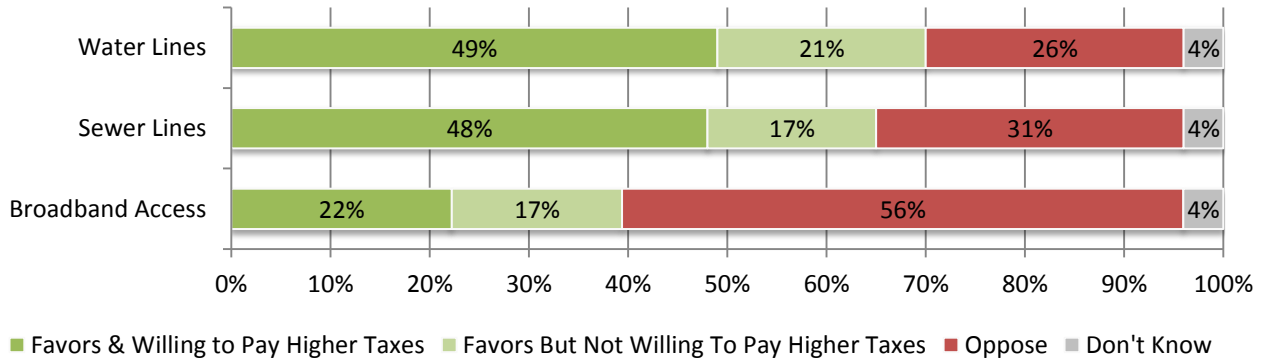

Community Development

Seven in ten (70%) residents favor using municipal funds to provide water lines to existing and potential development (although just 49% would be willing to pay more in taxes for it), followed by sewer lines (65%) and broadband access (39%).

- Households earning between \$90,001 and \$160,000 and those aged 40-49 are *more likely* to favor higher taxes for the development of water lines.

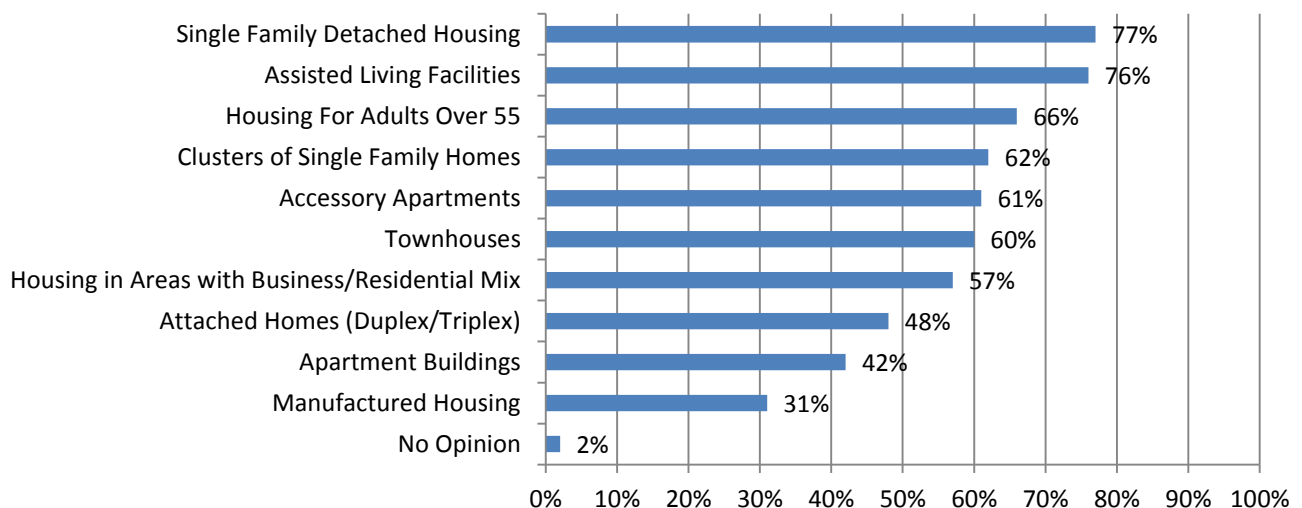

Figure 5: Favor or Oppose Using Municipal Funds to Provide Utilities for Development (q11)

Over three-fourths (77%) of residents think that their town should encourage single family detached housing, followed by assisted living facilities (76%), housing for adults over 55 (66%), clusters of single family homes (62%), accessory apartments (61%), townhouses (60%), housing in areas with business/residential mix (57%), attached homes (48%), apartment buildings (42%), and manufactured housing (31%).

- Households earning \$90,000 or less, younger people (18 to 39), those with a high school education or less and non-white residents are *more likely* to want their town to encourage apartments.
- Households earning between \$40,000 and \$90,000 and those aged 30 to 39 are more likely to want their town to encourage townhouses.

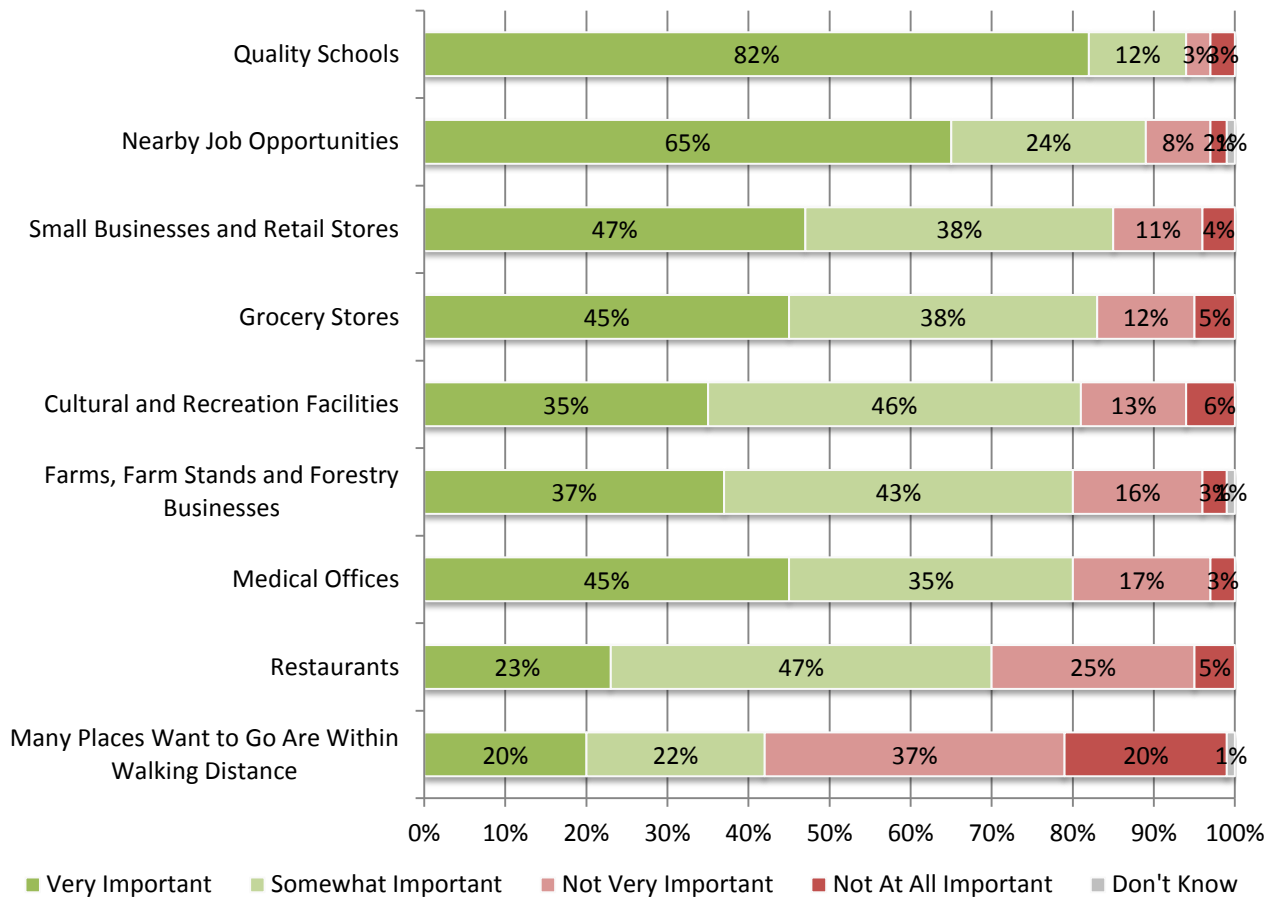

Figure 6: What kinds of housing should your town encourage? Check all that apply (q6)

Nearly all (94%) residents find it important (82% “very important” and 12% “somewhat important”) that there are quality schools in their community, followed by having nearby job opportunities (89%), small businesses and retail stores (85%), grocery stores (83%), cultural recreation facilities (81%), farms, farm stands and forestry businesses (80%), medical offices (80%), restaurants (70%) and that many places they want to go are within walking distance (42%).

- Young people (18 to 29), households earning between \$20,000 and \$39,999, those who are not employed and not looking and non-white residents are *more likely* to think it is very important to have medical offices.
- Older people (70 or older), households earning between \$20,000 and \$59,999, non-white residents and those who are employed in Hillsborough County are *more likely* to think restaurants are very important.
- Households with children, households earning more than \$160,000 and non-white residents are *more likely* to think that small businesses and retail stores are very important.
- Young people (18 to 29), households with children, households earning between \$20,000 and \$39,999 and NH residents of 5 years or less are *more likely* to think nearby job opportunities are very important.
- Young people (18 to 29) and households earning between \$20,000 and \$39,999 are *more likely* to think that many places you want to go are within walking distance is very important.

Figure 7: How Important Is It To Have In Your Community? (q3)

Only 9% of respondents find housing to be very affordable in their town, 54% find it somewhat affordable, 26% find it not very affordable, 6% find it not affordable at all and 5% don't know. When it comes to renting, only 8% find it very affordable, 38% find it somewhat affordable, 19% find it not very affordable, 6% find it not affordable at all and 26% don't know.

- Young people (18 to 29) and households earning between \$20,000 and \$59,999 are *more likely* to think that rent is somewhat affordable.

Figure 8: How Affordable is Housing in Your Town? (q4 & q5)

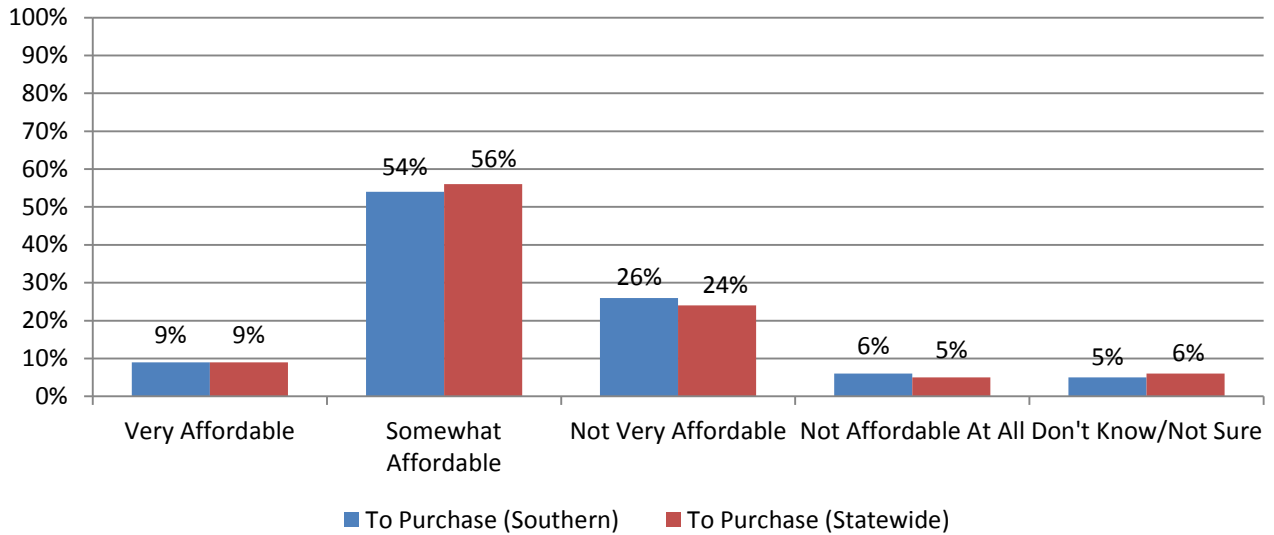

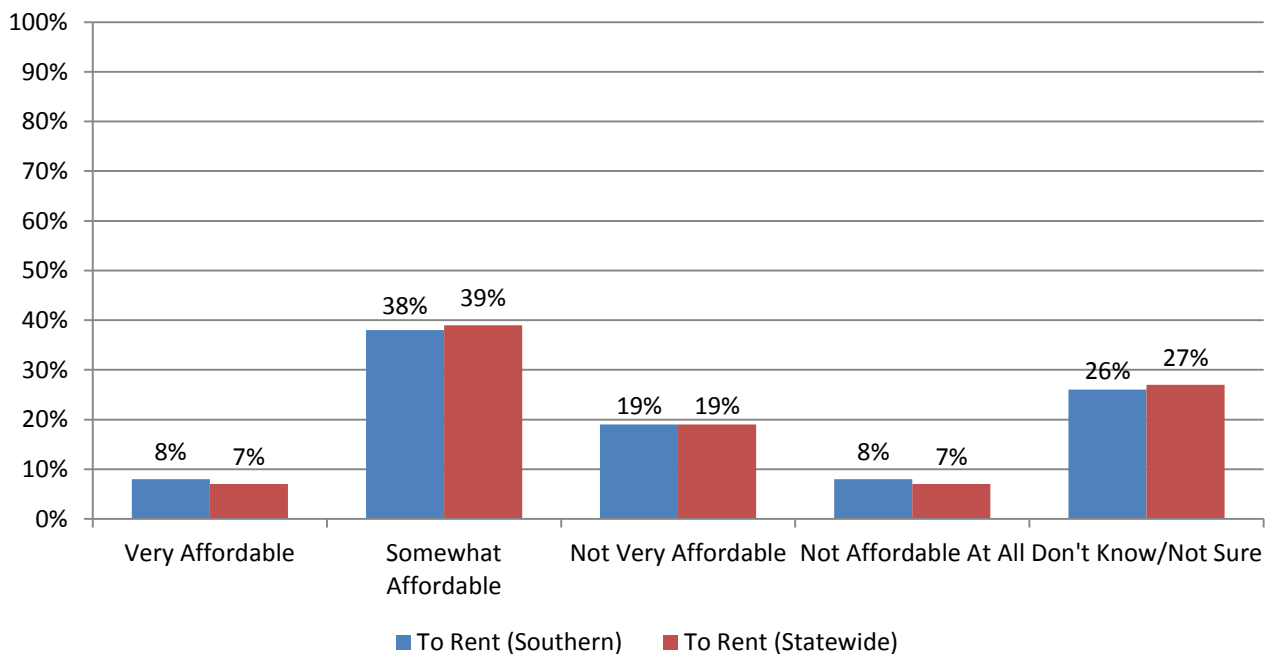

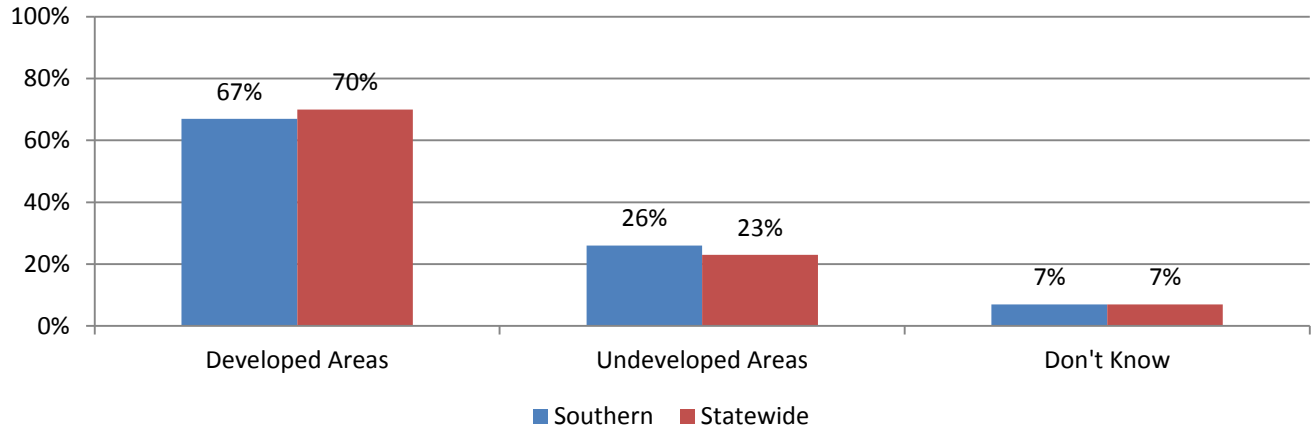

Figure 8b: How Affordable is Housing in Your Town? (q4 & q5)

Two-thirds (67%) of residents think that future development should occur in areas that are already developed while only 26% support development in undeveloped areas and 7% did not know.

Figure 9: Where should future development occur in your part of the state? (q8)

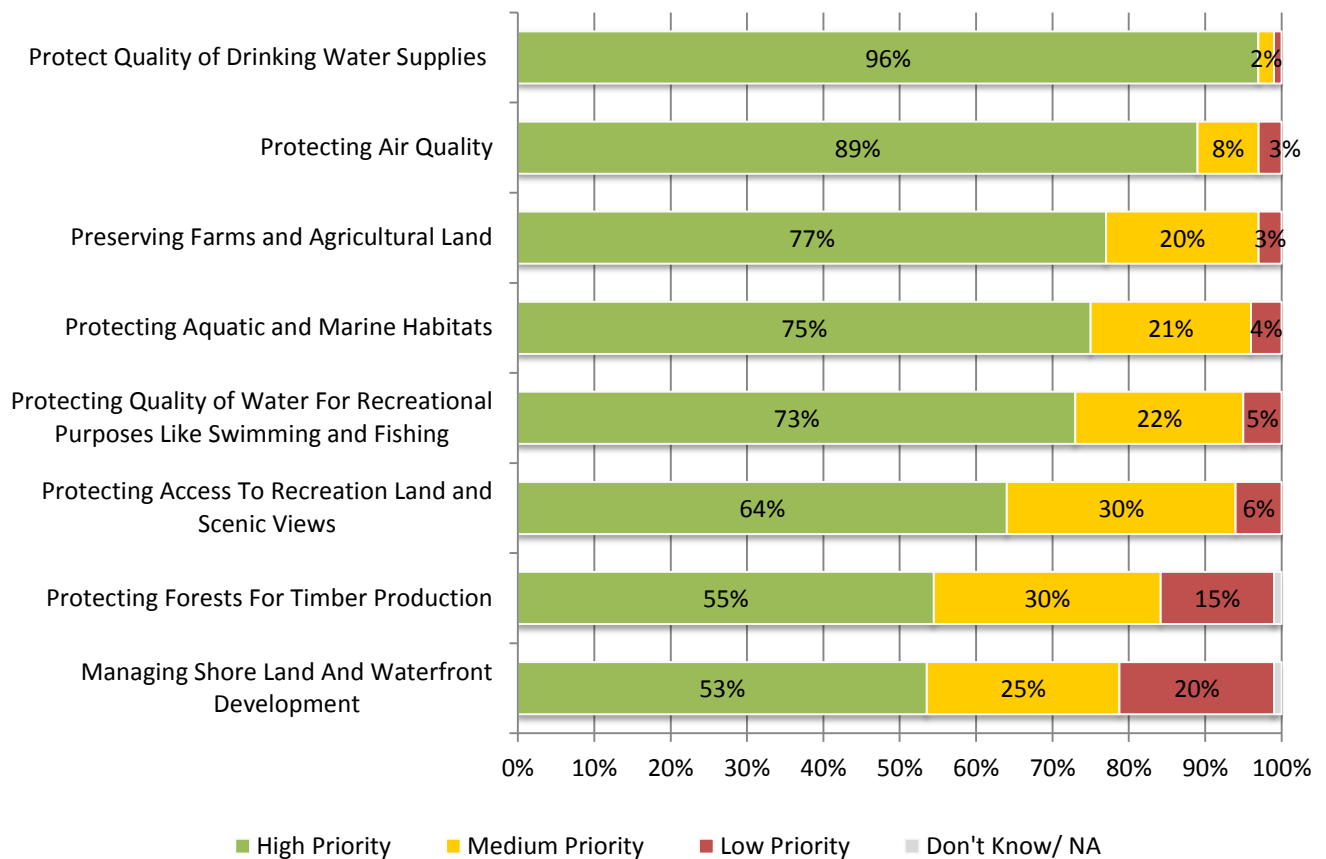

Environmental Protection

Nearly all residents (96%) view protecting water quality for drinking as a high priority for their community, followed by protecting air quality (89%), preserving farms and agricultural land (77%), protecting aquatic and marine habitats (75%), protecting water quality for recreational purposes like swimming and fishing (73%), protecting access to recreation land and scenic views (64%), protecting forests for timber production (55%), managing shore land and waterfront development (53%).

- Older people (70 or older) and those with a high school education or less are *more likely* to think protecting the quality of water for recreational purposes like swimming and fishing is a high priority.
- Young people (18 to 29) and those with technical school or some college education are *more likely* to think protecting access to recreation land and scenic views and preserving farms and agricultural land are high priorities.
- Households earning more than \$160,000 and those aged 60 to 69 are more likely to think managing shore land and waterfront development is a high priority.

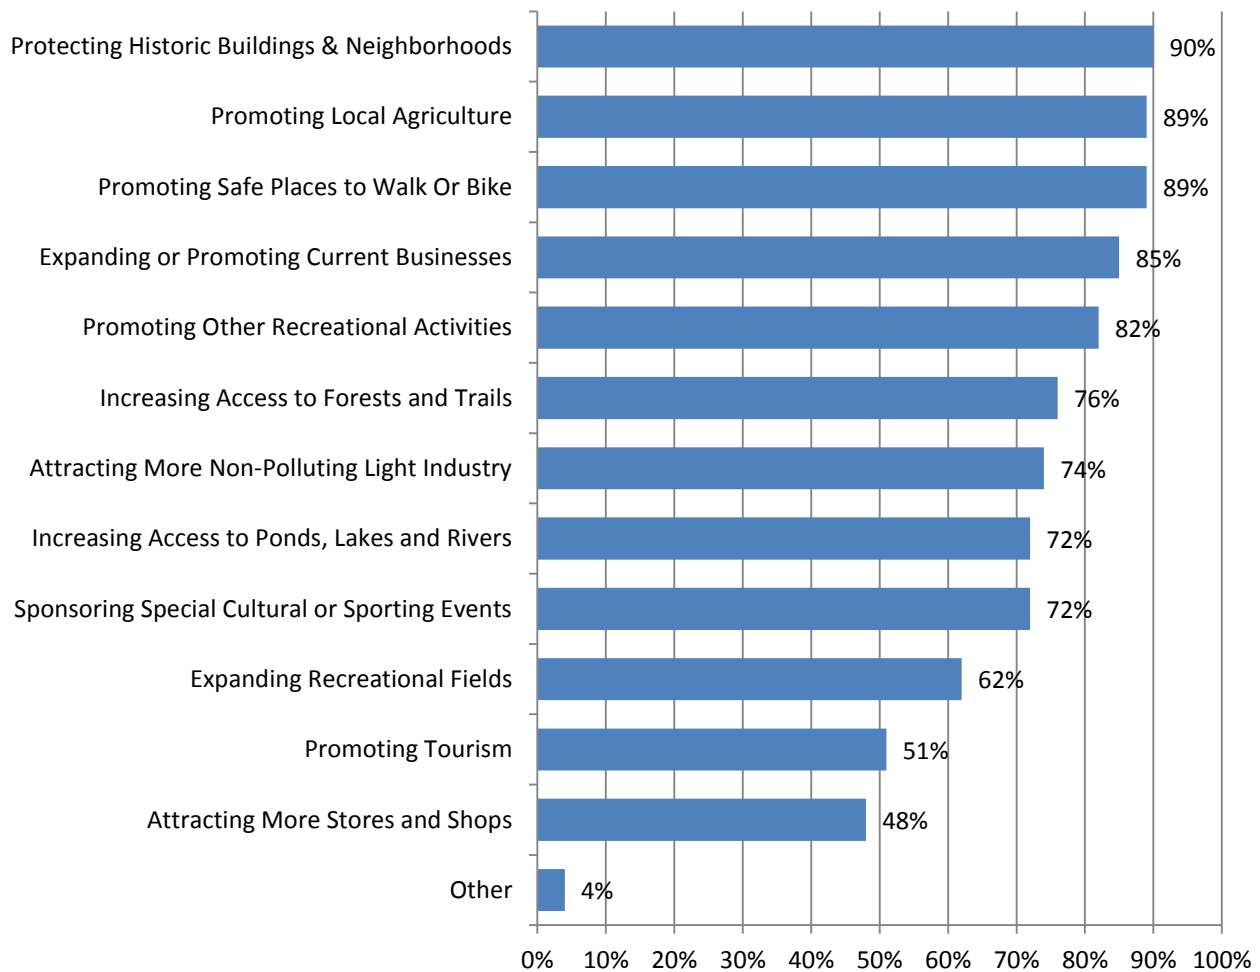

Figure 10: Priority Placed on These Community Issues (q9)

A large majority of residents (90%) say that protecting historic buildings & neighborhoods should be actively encouraged in the community, followed by promoting local agriculture (89%), promoting safe places to walk or bike (89%), expanding or promoting current businesses (85%), promoting other recreational activities (82%), increasing access to forests and trails (76%), attracting more non-polluting light industry (74%), increasing access to ponds, lakes and rivers (72%), sponsoring special cultural or sporting events (72%), expanding recreational fields (62%), promoting tourism (51%), and attracting more stores and shops (48%).

- Households earning between \$20,000 and \$39,999, older people (70 or older), and non-white residents are *more likely* to say their community should actively encourage promoting tourism.
- Older people (60 and older) and retired people are *more likely* to say their community should actively encourage attracting more stores and shops.
- Households earning between \$20,000 and \$59,999 are *more likely* to say communities should actively encourage sponsoring special cultural or sporting events.
- Households earning between \$20,000 and \$39,999, young people (18 to 29) and non-white residents are *more likely* to say their community should increase access to ponds, lakes and rivers.

Figure 11: What should be actively encouraged in your community? Check all that apply (q12)

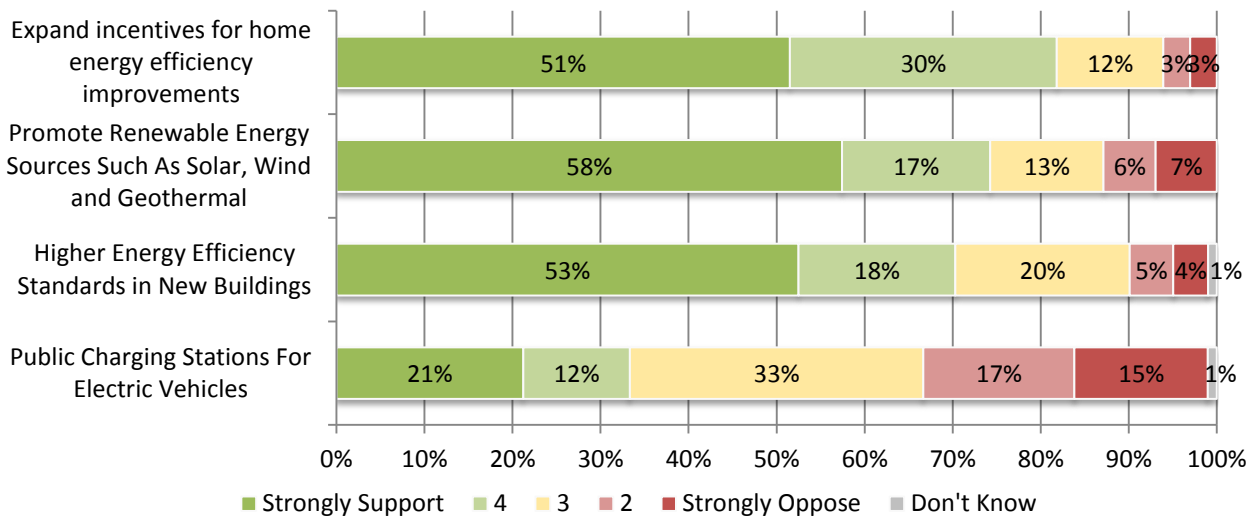

Energy Policies

Four in five residents (81%) support expanding incentives for home energy efficiency improvements (with 51% who “strongly support”), followed by promoting renewable energy sources such as solar, wind and geothermal (75%) and higher energy efficiency standards in new buildings (71%). Meanwhile only 33% were in support of public charging stations for electric vehicles.

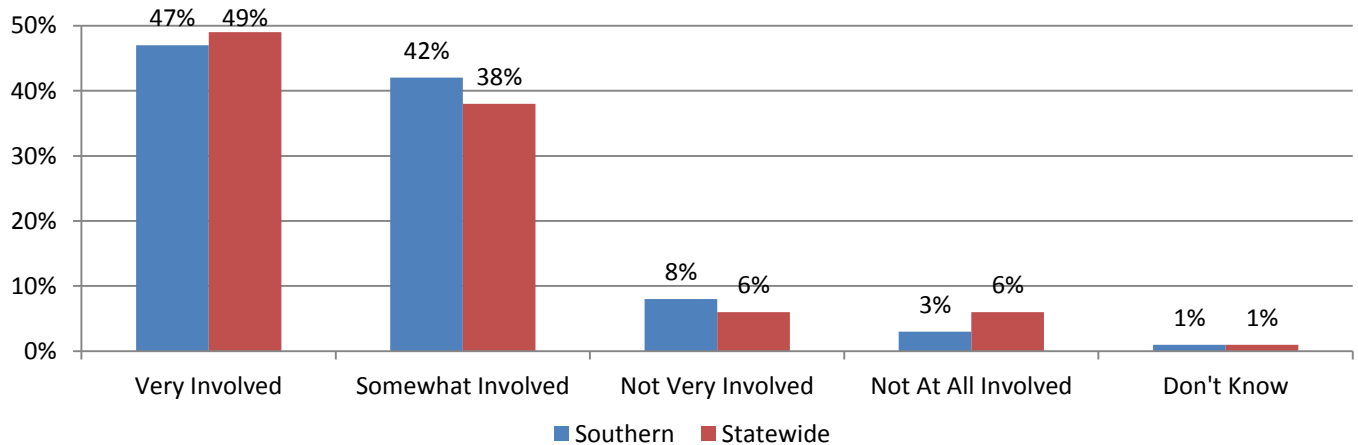

- Households earning between \$60,000 and \$90,000, those aged 30 to 39, those who work at home and the self-employed are *more likely* to strongly support incentives for home energy efficient improvements.
- Those with a high school education or less and the self-employed are *more likely* to strongly support public charging stations for electric vehicles.

Figure 12: Support/Oppose Energy Policy Changes (q13)

Almost half of residents (47%) think that local governments should be very involved in guidelines for renewable energy (such as large wind farms), 42% think they should be somewhat involved, 8% think they should be not very involved, 3% think they should be not at all involved and 1% don't know.

Figure 13: How Involved Should Local Governments Be In Guidelines For Renewable Energy? (q16)

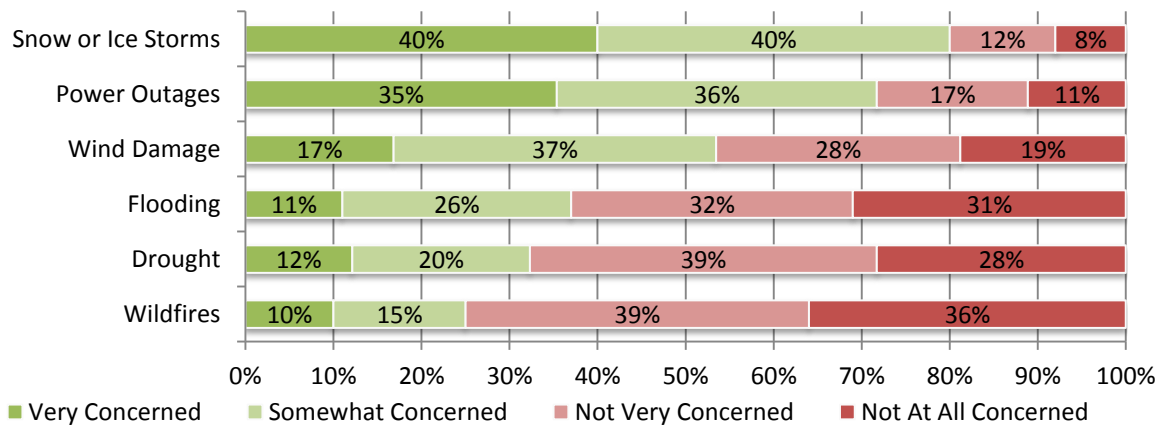

Emergency Preparedness

Four in five (80%) residents are concerned (40% “very concerned” and 40% “somewhat concerned”) with snow or ice storms in their community followed by power outages (71%), wind damage (54%), flooding (37%), drought (32%) and wildfires (25%).

- Older people (70 or older) are *more likely* to be very concerned about wind damage, while young people (18 to 29) are *less likely* to be very concerned.
- Households earning less than \$40,000 and non-white residents are *more likely* to be very concerned about snow or ice storms.
- Older people (70 and older) are *more likely* to be very concerned about flooding and wildfires.
- Young people (18 to 29) are *less likely* to be very concerned about power outages, while non-white residents and those who work at home are *more likely* to be concerned.

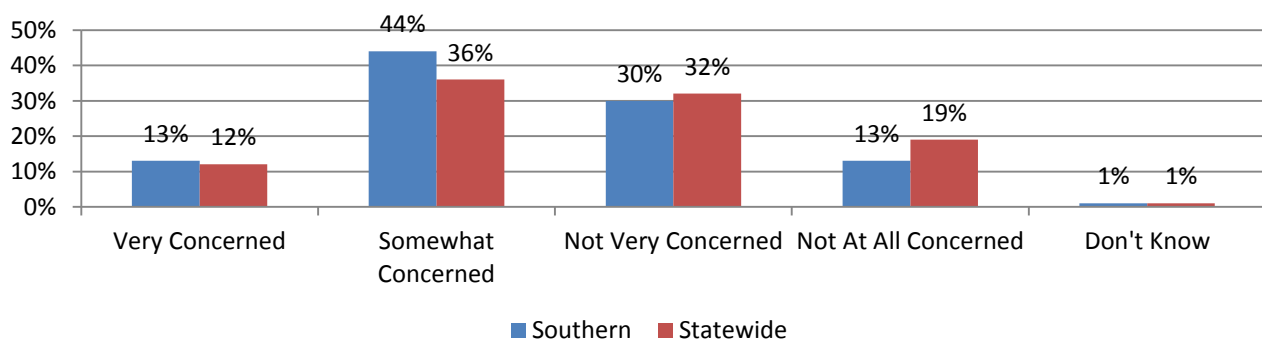

Figure 14: How Concerned Are You About Weather Related Events In Your Community? (q14)

Only 13% of residents are very concerned about their community’s level of preparedness in weather-related situations, while 44% are somewhat concerned, 30% are not very concerned, 13% are not at all concerned and 1% said they don’t know.

- Older people (70 and older) are *more likely* to be very concerned with their community’s preparedness.

Figure 15: Concerned about Your Community’s Level of Preparedness? (q15)

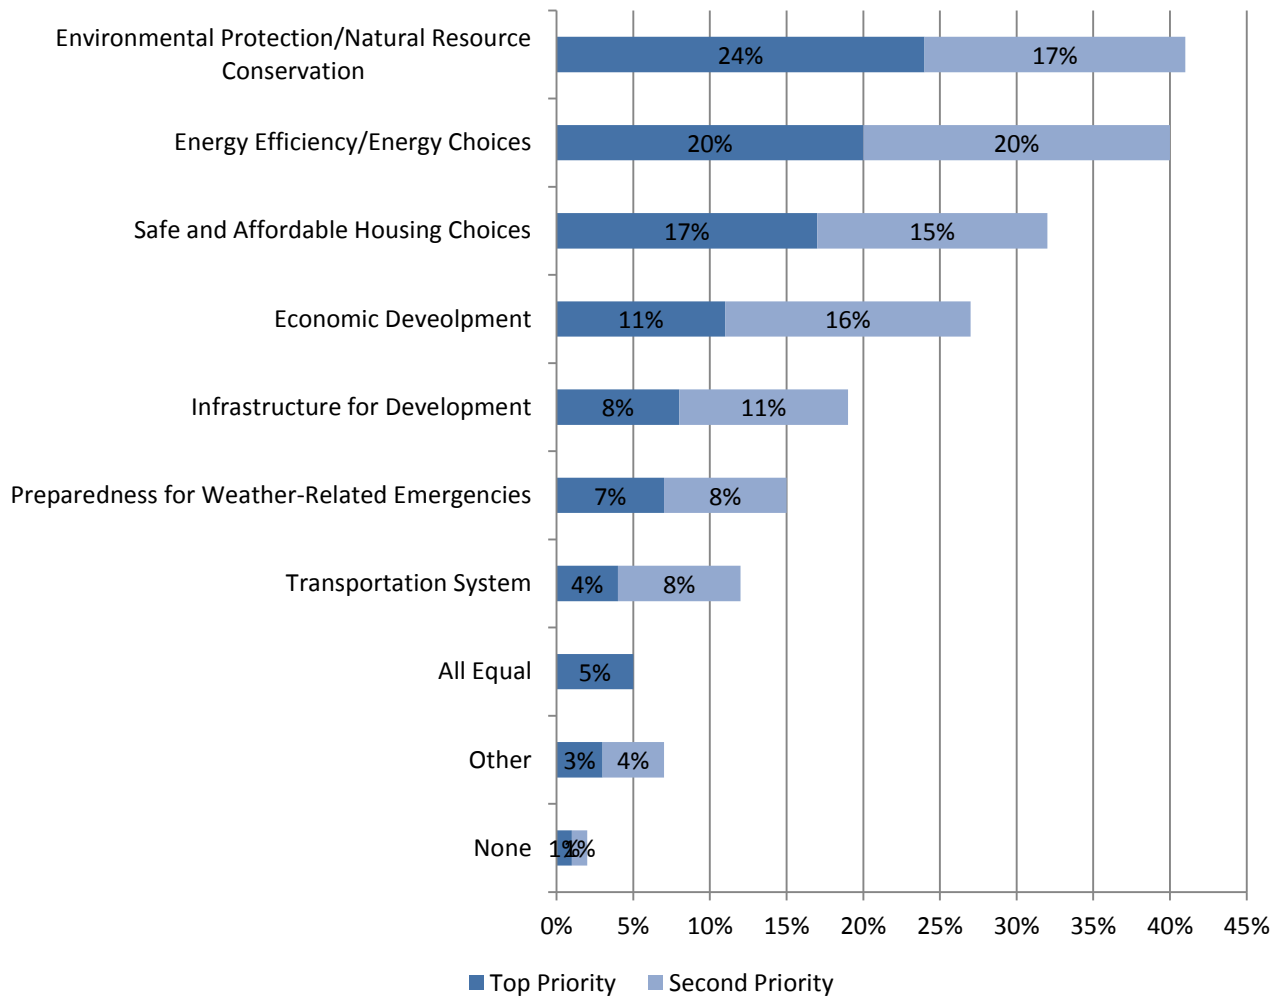

Priorities for Investing Public Dollars

Residents' top priority for investing public dollars is environmental protection (24%), followed by energy efficiency (20%), safe and affordable housing (17%), economic development (11%), infrastructure for development (8%), preparedness for weather-related or other emergencies (7%), transportation system (4%), all priorities are equal (5%), something else (3%) and none of the above (1%).

When the top two responses are combined environmental protection (41%) and energy efficiency (40%) are the two most cited priorities.

Figure 16: Priorities for Investing Public Dollars (q17)

Broadband

Nearly all (93%) residents have internet access in their home, while just 7% do not (**Figure 11**). For those who do not have internet access at home, a plurality (27%) says that they don't have it because they don't need it, followed by it is too expensive (15%), they don't have an adequate computer (13%), they don't know how to use it (9%), and they have access at another place like their job (5%). There were also 31% who cited another reason (**Figure 12**).

- Those who are 70 or older, those with a high school education or less, those who are unemployed and looking for work and households earning less than \$20,000 are *less likely* to have internet access at home.
- There were 5% of statewide residents who said they didn't have internet access because it wasn't available where they live. No resident in the Southern Region cited this as a reason.

Figure 17: Do You Have Internet Access At Home?

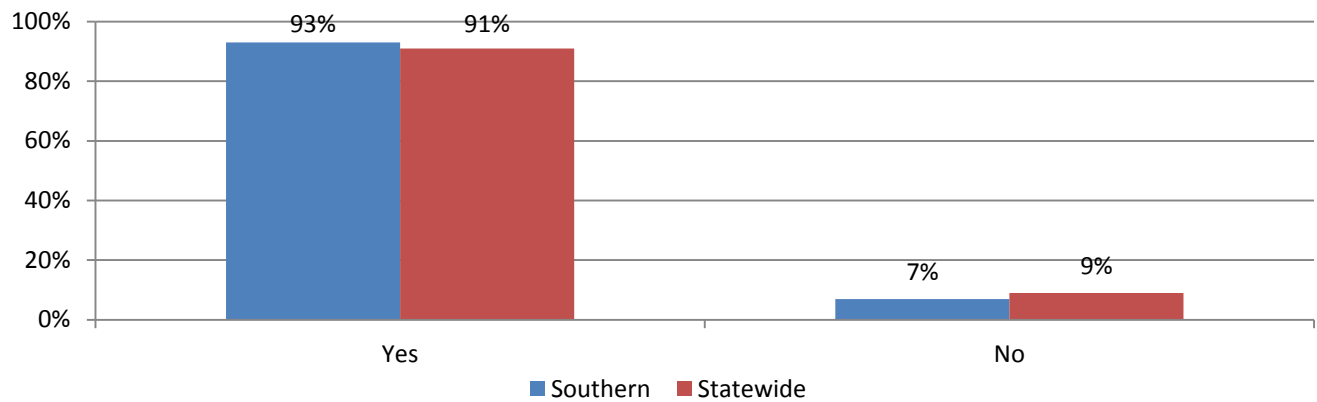

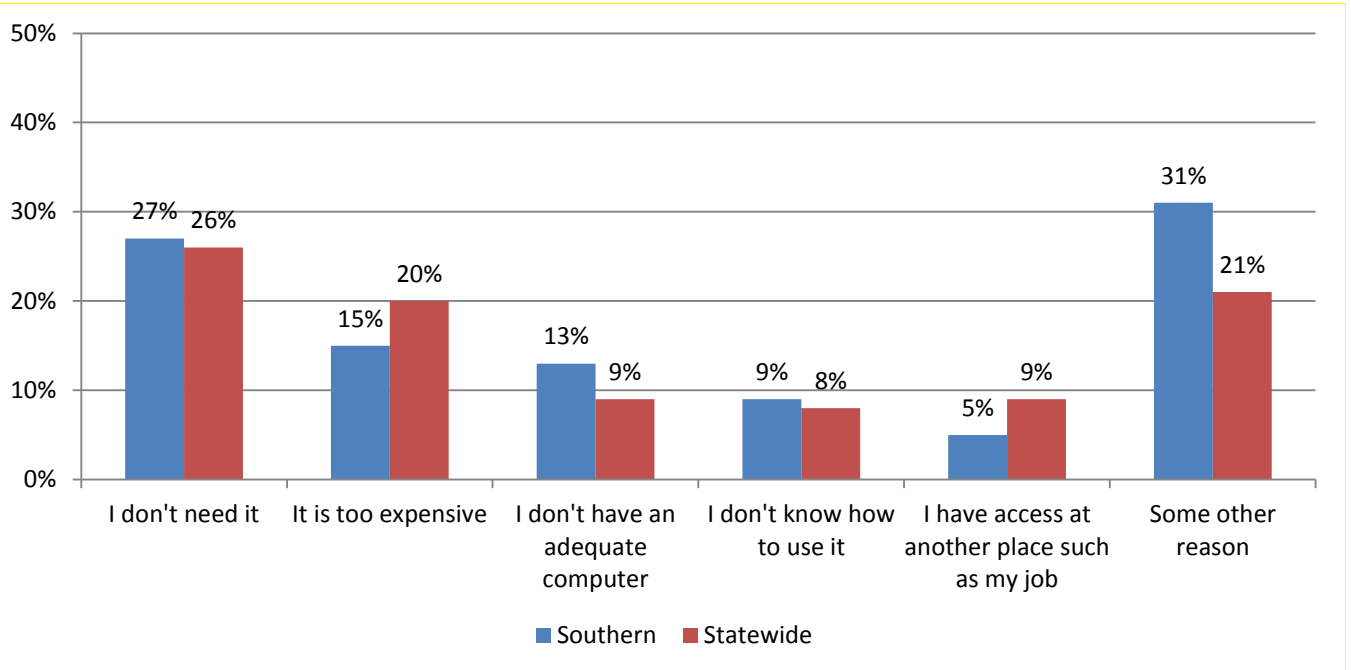

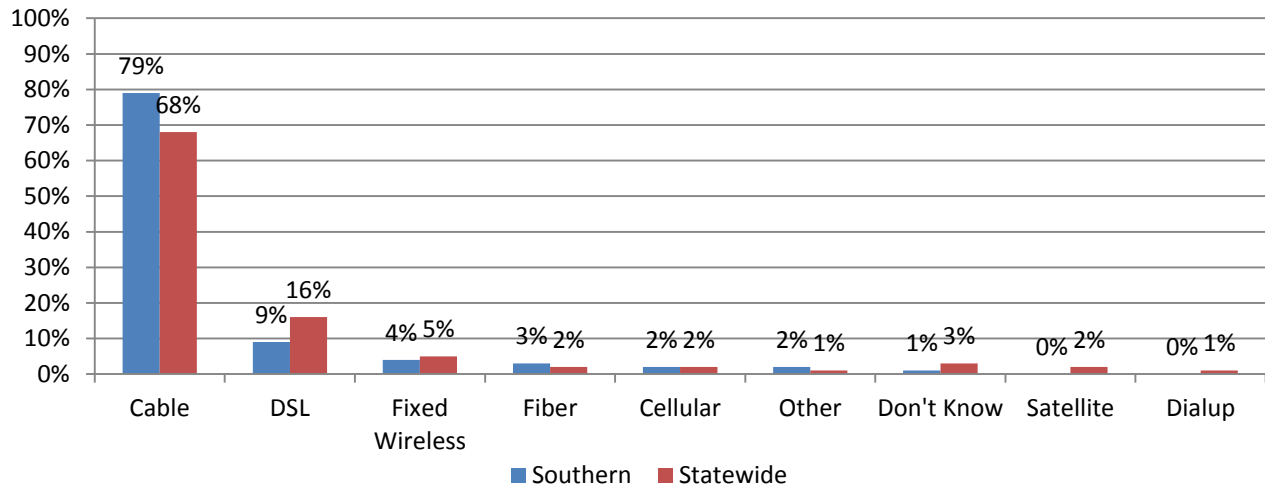

Figure 18: Most important reason why you don't have internet access at home?

Four in five (79%) of residents have a cable internet connection, followed by those with DSL (9%), fixed wireless (4%), dialup (3%) and cellular (2%). There were also less than 1% who have satellite or dialup, 1% who said they have had another type of connection and 3% didn't know.

- Residents of the Southern Region are *more likely* to have cable internet than statewide residents.
- Households earning less than \$20,000 are *less likely* to have cable internet.

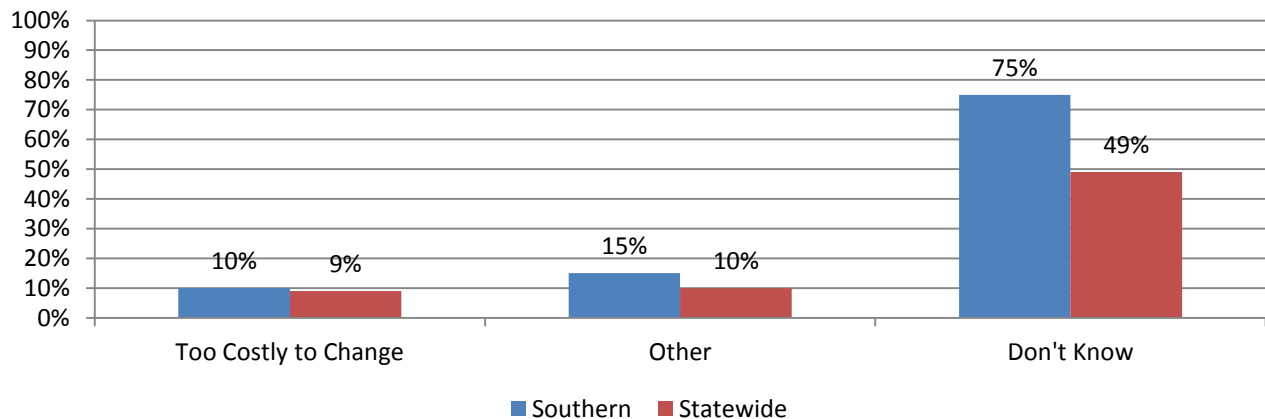

Figure 19: What type of internet connection do you have at home?

For those who do have a dialup or satellite connection, three in four (75%) say that they don't know why, followed by it being too costly to change (10%), and those who had another reason (15%).

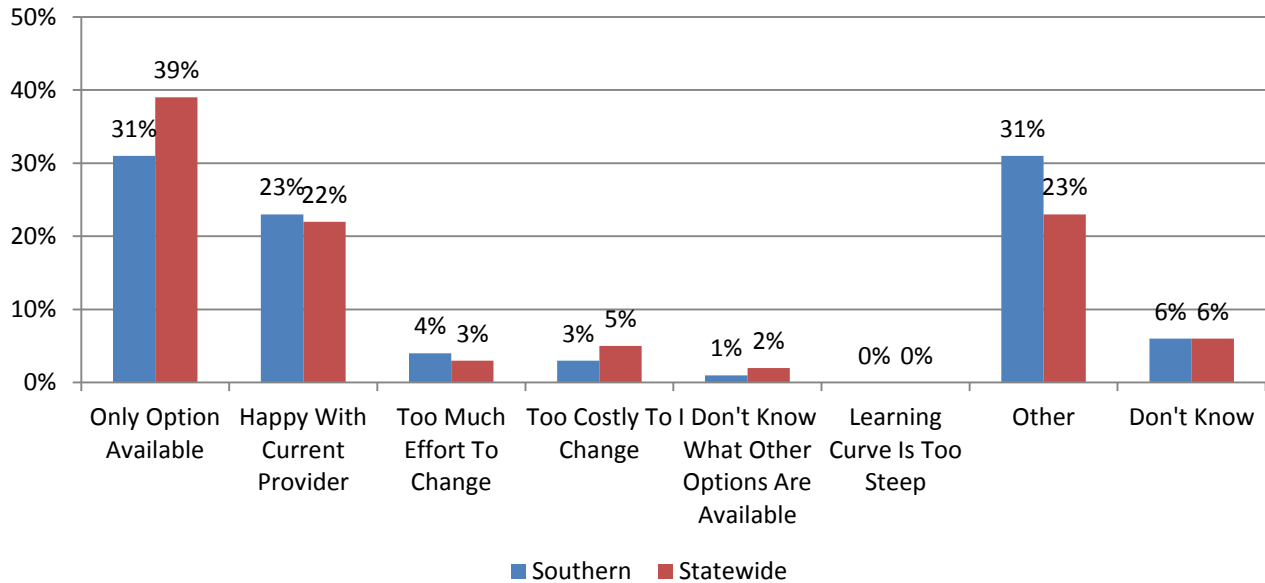

- These results were quite different from the statewide numbers (albeit both had a small sample size) as the following responses: it is the only option available (26% statewide), I don't know what other options are available (2%), the learning curve is too steep (2%) and it is too much effort to change (2%) were not selected.

Figure 20: If you are on dialup or satellite, why?

For those who don't have satellite or dialup, a plurality (31%) say that they have their current internet provider because it is the only option available, followed by being happy with their current provider (23%), it being too much effort to change (4%), it being too costly to change (3%), and they don't know what other options are available (1%). There were also 31% who had another reason and 6% who didn't know.

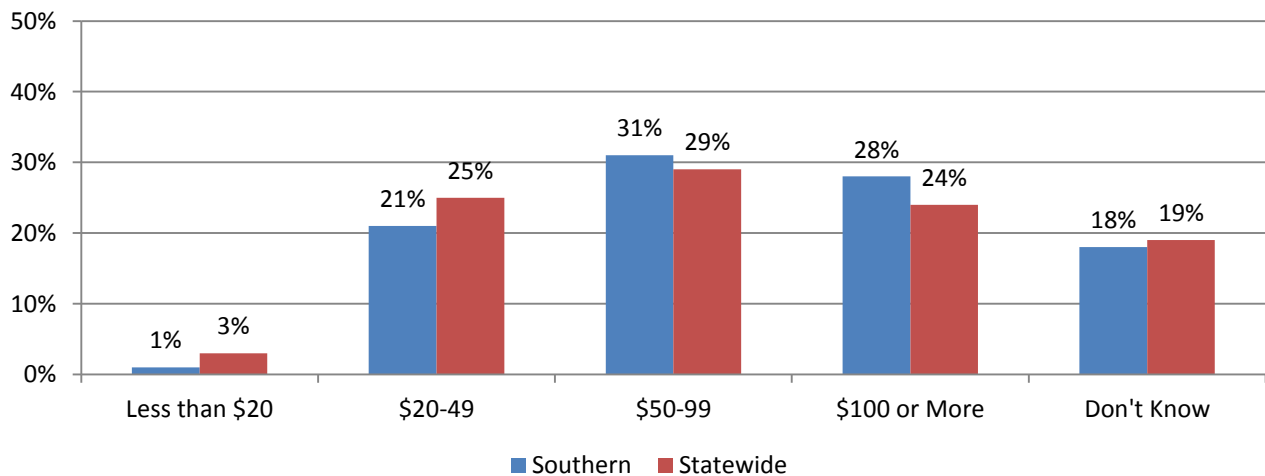

Figure 21: Why Are You Using Your Current Provider?

Only 1% of residents say that their monthly internet bill is less than \$20, while 21% pay \$20-49 per month, 31% pay \$50-99 per month, 28% pay \$100 or more per month and 18% did not know.

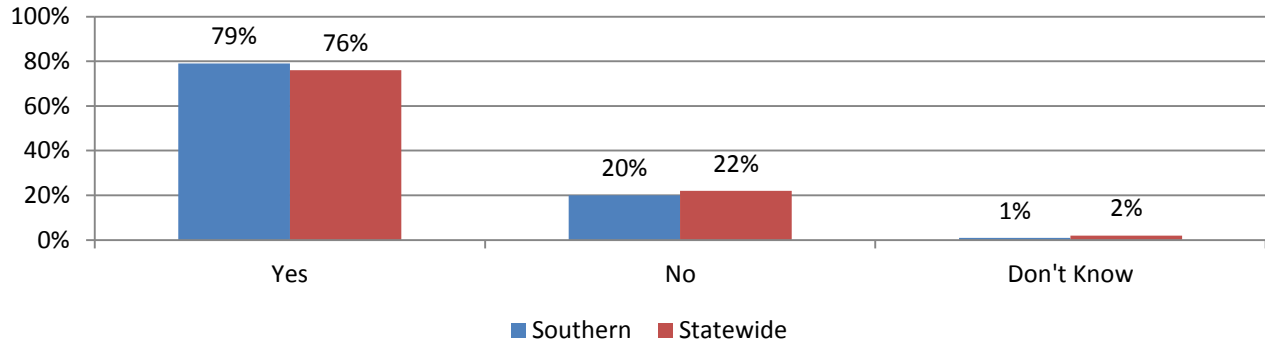

- Younger people (18 to 39) and households earning between \$20,000 and \$39,999 are *more likely* to pay \$20-49 per month for internet access. Older people (60 and older) are more likely to pay \$100 or more per month.

Figure 22: What is your monthly internet bill?

A large majority of residents (79%) currently pay for a bundled internet service, followed by 20% who don't have a bundled service and 1% who did not know.

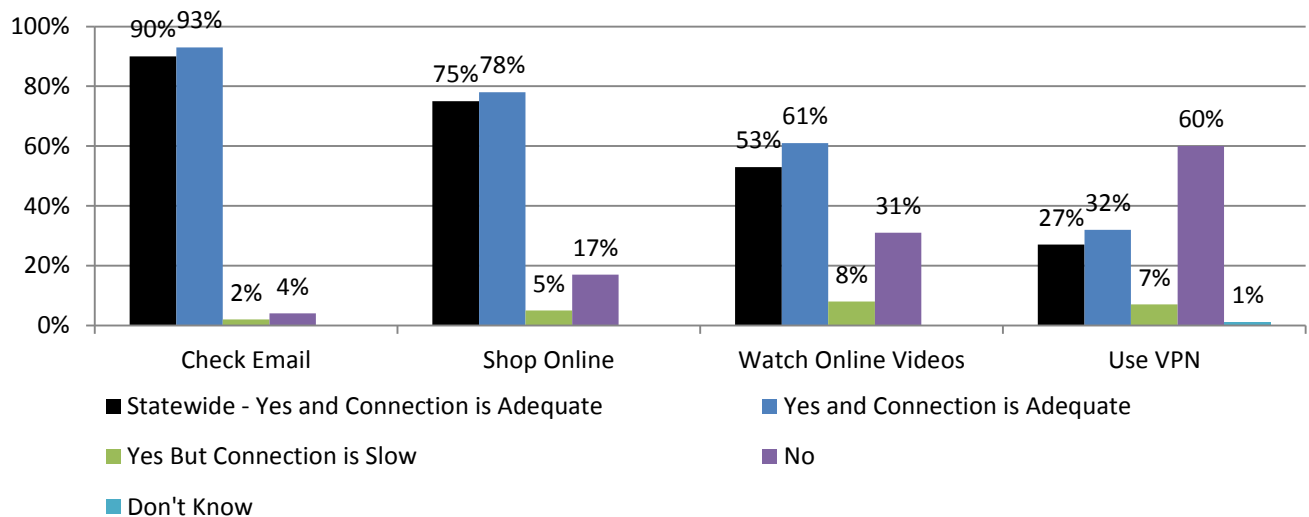

Figure 23: Do you pay for a bundled service?

Almost all (93%) residents use their home internet to check email and their connection is adequate to do so, 78% shop online with an adequate connection, 61% watch online videos with an adequate connection and 32% use VPN and have an adequate connection to do so.

- Older people (70 or older), and households earning less than \$40,000 are *less likely* to shop online.
- Older people (50 or older) and those who are retired are *less likely* to watch on-line video. Conversely, younger people (18 to 39) are *more likely* to watch on-line video.
- Households earning \$160,000 or more are *more likely* to use a VPN at home. Older people (70 or older) are *less likely* to use a VPN.

Figure 24: What Do You Use The Internet At Home For

Nearly all (94%) residents state that their internet connection is adequate for their uses, followed by 5% who say their connection is not adequate and 1% who don't know (**Figure 19**). A large majority (87%) of residents would not be willing to pay more for faster internet speeds; 10% would be willing to pay 25% more per month, 1% would be willing to pay 50% more per month and 3% don't know (**Figure 20**).

Figure 25: Do you consider your internet connection adequate for your uses?

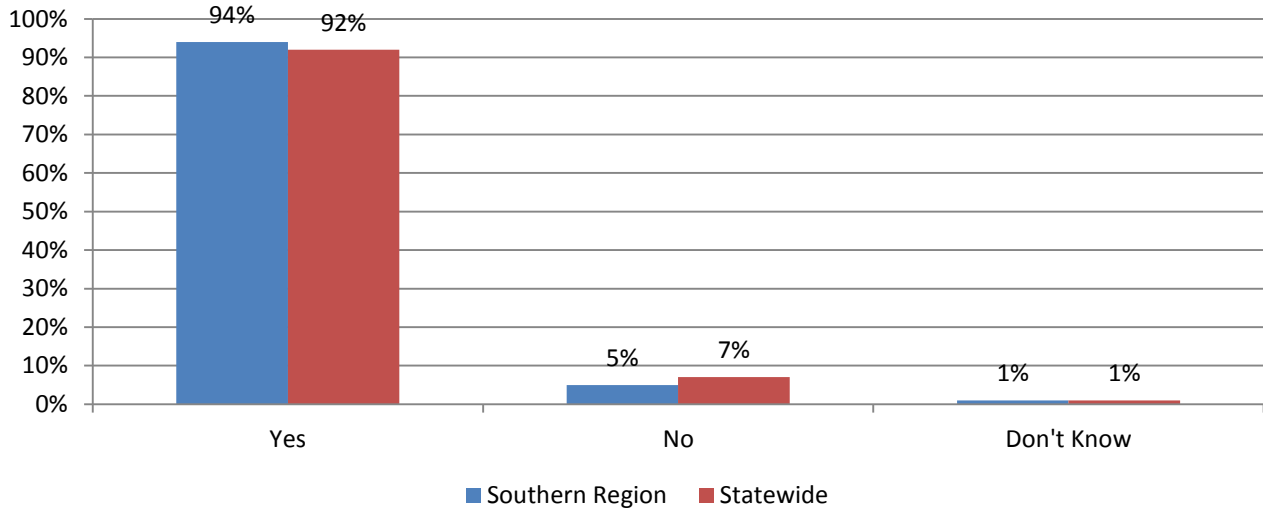

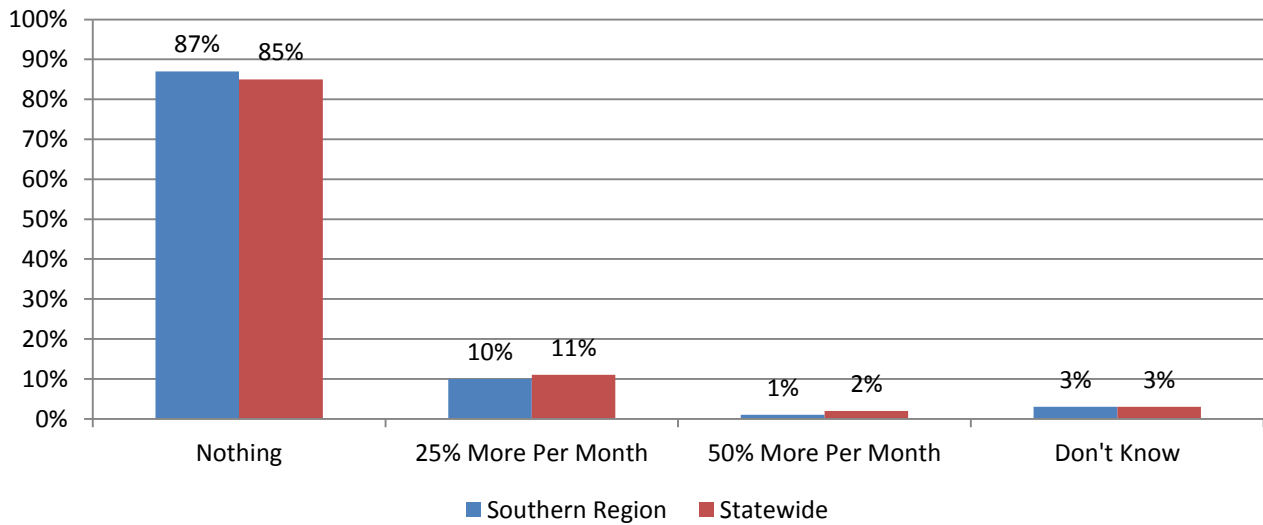

Figure 26: How much more (if any) would you be willing to pay for faster internet speeds?

Technical Report

How the Sample Was Selected

The New Hampshire Regional Planning Commissions A Granite State Future (GSF) Survey was a telephone survey of randomly selected adults in the state of New Hampshire. This survey was conducted using a procedure called Random Digit Dialing (RDD), of both landline and cellular telephone.

A sample of households in the area was selected by a procedure known as random digit dialing. The way this works is as follows. First, with the aid of a computer, one of the three digit telephone exchanges that are currently used in the state (e.g., 772) is randomly selected. The computer then randomly selects one of the "working blocks"--the first two of the last four numbers in a telephone number (e.g., 64)--and attaches it to the randomly selected exchange. Finally, the computer program then generates a two digit random number between 00 and 99 (e.g., 57) which is attached to the previously selected prefix (772), and the previously selected working block (64) resulting in a complete telephone number, i.e., 772 6457. This procedure is then repeated numerous times by the computer to generate more random numbers, so that we have a sufficient quantity to conduct the survey. The end result is that each household in the area in which there is a telephone has an equally likely chance of being selected into the sample. This procedure is done for both land line and cellular exchanges.

The random sample used in the GSF survey was purchased from Scientific Telephone Samples (STS), Foothill Ranch, CA. STS screens each selected telephone number to eliminate non-working numbers, disconnected numbers, and business numbers to improve the efficiency of the sample, reducing the amount of time interviewers spend calling non-usable numbers.

Each of these randomly generated telephone numbers is called by one of our interviewers from a centrally supervised facility at the UNH Survey Center. If the number called is found not to be a residential one, it is discarded and another random number is called. (Approximately forty-five percent of the numbers were discarded because they are found to be businesses, institutions, or not assigned.) If it is a residential number, the interviewer then randomly selects a member of the household by asking to speak with the adult currently living in the household who has had the most recent birthday. This selection process ensures that every adult (18 years of age or older) in the household has an equally likely chance of being included in the survey. No substitutions are allowed. If, for example, the randomly selected adult is not at home when the household is first contacted, the interviewer cannot substitute by selecting someone else who just happens to be there at the time. Instead, he or she must make an appointment to call back when the randomly selected adult is at home. In this way, respondent selection bias is minimized.

When the Interviewing Was Done

New Hampshire adults in the GSF survey were interviewed between May 9 and July 6, 2013. Each selected respondent was called by a professional UNH Survey Center interviewer from a centrally supervised facility at the UNH Survey Center. Telephone calls during the field period were made between 9:00 AM and 9:00 PM.

Response Rates

Interviews were completed with 2,935 randomly selected adults in New Hampshire from a sample of 25,114 randomly selected telephone numbers. Using American Association for Public Opinion (AAPOR) Response Rate 4, the response rate for the Granite State Future survey was 33% percent. The formula to calculate standard AAPOR response rate is:

$$\frac{I}{(I + P) + (R + NC + O) + e(UH + UO)}$$

I=Complete Interviews, **P**=Partial Interviews, **R**=Refusal and break off, **NC**=Non-Contact, **O**=Other, **e**=estimated portion of cases of unknown eligibility that are eligible, **UH**=Unknown household, **UO**=Unknown other.

Weighting of Data

The data have been weighted to account for known biases of telephone surveys. The data in the Granite State Future survey are weighted by the number of adults and telephone lines (landlines and cell phones) within households to equalize the chances that any one adult would be selected for inclusion. The data are also weighted by respondent sex, regional planning commission, and age of respondent.

Sampling Error

The Granite State Future survey, like all surveys, is subject to sampling error due to the fact that all residents in the area were not interviewed. For those questions asked of five hundred (500) or so respondents, the error is +/- 4.4%. For those questions where fewer than 500 persons responded, the sampling error can be calculated as follows:

$$Sampling\ Error = \pm 1.96 \sqrt{\frac{P(1 - P)}{N}}$$

Where P is the percentage of responses in the answer category being evaluated and N is the total number of persons answering the particular question.

For example, suppose you had the following distribution of answers to the question, "Should the state spend more money on road repair even if that means higher taxes?" Assume 1,000 respondents answered the question as follows:

YES	47%
NO	48%
DON'T KNOW	5%

The sampling error for the "YES" percentage of 47% would be

$$\pm 1.96 \sqrt{\frac{47(53)}{1000}} = \pm 3.1\%$$

for the "NO" percentage of 48% it would be

$$\pm 1.96 \sqrt{\frac{48(52)}{1000}} = \pm 3.1\%$$

and for the "DON'T KNOW" percentage of 5% it would be

$$\pm 1.96 \sqrt{\frac{5(95)}{1000}} = \pm 1.4\%$$

In this case we would expect the true population figures to be within the following ranges:

YES	43.9% - 50.1% (i.e., 47% ±3.1%)
NO	44.9% - 51.1% (i.e., 48% ±3.1%)
DON'T KNOW	3.6% - 6.4% (i.e., 5% ±1.4%)

Appendix A: Detailed Tabular Results

Q1: "How would you classify the neighborhood where you live? Would you say you live in a downtown or town center ... a neighborhood close to your town center ... a neighborhood away from your town center ... or in a rural location away from other development?"

Appendix B: Open-Ended Responses

Q1 "How would you classify the neighborhood where you live? Would you say you live in a downtown or town center ... a neighborhood close to your town center ... a neighborhood away from your town center ... or in a rural location away from other development?" (Other Responses)

Town	Description
Bedford	"I don't think my town has a town center." lives in suburban area
Hooksett	small town but its a good neighborhood

Q12 "Which of the following things should be actively encouraged in your community?" (Other Responses)

- Active police department
- Better noise control would be a good thing
- Coastline should be carefully redeveloped.
- Create a lake (laughs)
- Encourage low density housing, I believe the town is developing way too fast, no infrastructure for it and taxes will be increased. I moved to Londonderry and I don't want to live in a city.
- enforce speed limits
- Establish more protective land especially where wildlife is present or traveling through
- Farmers markets
- Improving the schools
- Keeping taxes low. Making a favorable business environment.
- larger tax base
- Libraries
- library, historical society, senior center and other organizations
- lower taxes
- Maintaining what we have
- More alternative energy sources
- More for the teenagers to do - access to volleyball and other activities. Also more for the elderly - places to go & access to get there; seniors should have much more help than they're getting. Also, medical costs need to come down, especially for medications. Also higher wages, lower cost for groceries & gas.
- More recycling
- Paved bike trails
- People in power promoting working with large national businesses (bowling, bmw, kai, Honda, Mercedes) to bring more jobs into the state
- playgrounds/areas
- Protection of Wildlife
- Recreational spots should be improved a little bit, sanitizer, add bathrooms to spots.
- Stop wasting money!
- The town of Derry must focus on existing residential neighborhoods, and improving zoning laws. Taxes need to be lowered.
- town recycling
- Widen roads, to put in bike routes, also thru woods on utility easements

Q17 “We have discussed many issues facing New Hampshire communities. Which of the following do you think should be the TOP priority for investment of public dollars?” (Other Responses)

- agriculture
- Animals and Children that are abused and strays/homeless
- Anti-Terrorism
- Education
- Education
- Education
- education
- education
- education
- Equitable and sufficient funding for public education.
- I suppose none of this makes a difference if people can't afford to live
- jobs
- Jobs
- Limited government
- local education
- Medical
- organic food is first concern, natural resources, energy efficient, "being green"
- reduce the input of politics for the community--not close the door for the community--don't wreck it
- school funding
- schools
- Schools
- senior transportation to and from and development for senior homes
- stopping thieves
- The events themselves in the preparedness option
- There should be a system to lessen the burden on tax payers.

Net2 “Which of the following is the most important reason why you don’t have internet access at home?” (Other Responses)

- Don't have computer
- House was broken into and computer was stolen and they access. Also, he has no interest.
- I don't go on it, I rarely use it
- other
- they don't use internet a lot

Net 3A “If you are on dialup or satellite, why?” (Other Responses)

- So I can contact people
- that’s just what we have

Net4 “Who is your current provider? “ (Other Responses)

- AT&T (1)
- Broadband (1)
- Cable (1)
- Comcast (291)
- Direct TV (2)
- Fairpoint (21)
- Fiber Optic (1)
- Fios (1)
- Granite State Communications (2)
- GSI (1)
- HughesNet (3)
- Juno (1)
- Metrocast (8)
- NetZero (2)
- TDCR (1)
- Verizon (14)
- Xfinity (7)

Net5 “Why are you using your current provider?” (Other Responses)

Provider	Reason
Cable	only one she used
Comcast	Because I hated Fairpoint. The state should never have gone into contract with them three years ago when they separated from Verizon.
Comcast	Because its there
Comcast	because she works there
Comcast	Best option out of three choices
Comcast	bundled services
Comcast	bundles everything together
Comcast	Changed to Comcast because of price.
Comcast	convenience
Comcast	convenience
Comcast	convenience w/ bundled service
Comcast	Efficient, here, do a good job
Comcast	everyone has to use in his building
Comcast	good bundle service
Comcast	Good package deal
Comcast	has bundle
Comcast	haven't changed it in years
Comcast	he works for Comcast
Comcast	her mom got it
Comcast	husband picked it
Comcast	husband picked it
Comcast	it was affordable at the time we got it but its a little pricey now
Comcast	it's what my mother chose
Comcast	no other options
Comcast	speed
Comcast	we got a bundle deal
Comcast	We switched to Comcast for faster internet speeds and we saved a little bit of money.
Comcast	Always have
Comcast	Always have used them
Comcast	Best deal
Comcast	Best efficiency for what I am looking for
Comcast	Bundle package
Comcast	Bundled package for everything else
Comcast	Bundled service
Comcast	Bundled service
Comcast	Competitive and convenient and not many other options
Comcast	Condo Association Rule
Comcast	Fast speed free security

Comcast	Fastest available
Comcast	fastest one he thinks and he already has cable TV
Comcast	fastest/best around for the price
Comcast	first ones to try and help
Comcast	good bundle package
Comcast	good bundled service deal
Comcast	Good deal
Comcast	her mom got it
Comcast	husband picked it
Comcast	husband's choice--not mine
Comcast	I am employee and I get it for free
Comcast	I have a home business
Comcast	I prefer them over everyone else
Comcast	It gives her what she needs
Comcast	It's what my mother pays for
Comcast	Just convenient
Comcast	Just have been for awhile
Comcast	Likes Bundle package
Comcast	my daughter pays for it
Comcast	My husband picked it out
Comcast	offer all the services
Comcast	package deal
Comcast	package deal has many "choices"
Comcast	Parents choice
Comcast	renting, and thats what's provided by landlord
Comcast	speed
Comcast	speed
Comcast	speed
Comcast	They offer a bundle and it seems to be the most efficient way to handle
Comcast	Tried the other ones out and this was the best option
Comcast	Unlimited choices
Comcast	Using because of high speed and reliability; Hates the fact that it is her only option, feels there is no other cable
Comcast	Very convenient
Comcast	We've always had it, and it's worked for us
Comcast	Wife chose it
Comcast	because they provide a bundled service.
Comcast	it's cheap to have cable, phone and internet.
Comcast	It's the best deal.
Comcast	switched to the bundled service when they had the deal.
Comcast	they're the best deal.
dial up, netzero??	It's cheap

Fairpoint	already there with roommate
Fairpoint	because its there
Fairpoint	bundle pack
Fairpoint	Switched from FIOS from dialup, it was new, available, affordable, and they weren't going to charge \$1200 to run cable down the driveway like Comcast
Fairpoint	they came with the package deal for cable service for our TV
Fairpoint	they were offering the best offer at the time
fairpoint	they were the cheapest
fairpoint	Why Not?
Fiber Optic	Local
Granite State Communications	It's the town telephone company
GSI	they provide local fiber optic cable and internet
metrocast	convenience
Rather not say	Good Rate
Verizon	it's cheaper than using Comcast, I wish we had other choices
Verizon	Tried everybody else
Verizon	very cheap
Verizon	wife told me to
Verizon.	Because our cell phones are through them. so its all on one bill.
xfinity	it was the cheapest for what we wanted when we got it
Xfinity	bundled
Xfinity (comcast)	convenience
Xfinity, comcast.	the best deal.
